

2.3: Discussion Topic

Discussion

This week we've learned about selection and hiring. Then, we learned about ways to make sure your new employee is ready to get to work in the job you hired them for. Let's have a discussion about new hire training, orientation, onboarding, and coaching/mentoring.

Think about a time when you were new (this can be to a job, a school, volunteering, etc.). Tell us about your experience.

- Did you receive any of the above?
- What was your first day like? Your first week?
- What went well, and what would you do differently if you were the manager?
