

17.6: Problem Sets

This course contains problem sets that accompany each module. In these problem sets, students are given an opportunity to apply the quantitative-reasoning skills they learned throughout the module.

The problem sets are derivatives from the practice questions that are scattered throughout the course for practice—sometimes housed within a content page or sometimes found on a separate page titled “Learn By Doing.” If students complete the practice questions, which allow unlimited attempts with various numbers, they may have already encountered the majority of the questions in the problem sets.

These will come automatically loaded into your assignment tool in your LMS, but may be downloaded, adjusted, deleted, or personalized to fit your class needs.

Module	Problem Set
1 Economic Thinking	<ul style="list-style-type: none"> • Assignment: Problem Set — Economic Thinking
2 Choice in a World of Scarcity	<ul style="list-style-type: none"> • Assignment: Problem Set — Choice in a World of Scarcity
3 Supply and Demand	<ul style="list-style-type: none"> • Assignment: Problem Set — Supply and Demand
4 Applications of Supply and Demand	<ul style="list-style-type: none"> • Assignment: Problem Set — Applications of Supply and Demand
5 Elasticity	<ul style="list-style-type: none"> • Assignment: Problem Set — Elasticity
