

LEGAL ENVIRONMENT OF BUSINESS

Lumen Learning

Book: Legal Environment of Business
(Lumen)

This text is disseminated via the Open Education Resource (OER) LibreTexts Project (<https://LibreTexts.org>) and like the hundreds of other texts available within this powerful platform, it is freely available for reading, printing and "consuming." Most, but not all, pages in the library have licenses that may allow individuals to make changes, save, and print this book. Carefully consult the applicable license(s) before pursuing such effects.

Instructors can adopt existing LibreTexts texts or Remix them to quickly build course-specific resources to meet the needs of their students. Unlike traditional textbooks, LibreTexts' web based origins allow powerful integration of advanced features and new technologies to support learning.

The LibreTexts mission is to unite students, faculty and scholars in a cooperative effort to develop an easy-to-use online platform for the construction, customization, and dissemination of OER content to reduce the burdens of unreasonable textbook costs to our students and society. The LibreTexts project is a multi-institutional collaborative venture to develop the next generation of open-access texts to improve postsecondary education at all levels of higher learning by developing an Open Access Resource environment. The project currently consists of 14 independently operating and interconnected libraries that are constantly being optimized by students, faculty, and outside experts to supplant conventional paper-based books. These free textbook alternatives are organized within a central environment that is both vertically (from advance to basic level) and horizontally (across different fields) integrated.

The LibreTexts libraries are Powered by [NICE CXOne](#) and are supported by the Department of Education Open Textbook Pilot Project, the UC Davis Office of the Provost, the UC Davis Library, the California State University Affordable Learning Solutions Program, and Merlot. This material is based upon work supported by the National Science Foundation under Grant No. 1246120, 1525057, and 1413739.

Any opinions, findings, and conclusions or recommendations expressed in this material are those of the author(s) and do not necessarily reflect the views of the National Science Foundation nor the US Department of Education.

Have questions or comments? For information about adoptions or adaptations contact info@LibreTexts.org. More information on our activities can be found via Facebook (<https://facebook.com/Libretexts>), Twitter (<https://twitter.com/libretexts>), or our blog (<http://Blog.Libretexts.org>).

CHAPTER OVERVIEW

1: The Foundations

- 1.1: Rule of Law
- 1.2: The Court System and ADR
- 1.3: Reading Criminal Law
- 1.4: Ethics
- 1.5: International Law and a Global Economy

This page titled [1: The Foundations](#) is shared under a [not declared](#) license and was authored, remixed, and/or curated by [Lumen Learning](#).

1.1: Rule of Law

LEARNING OBJECTIVES

1. Understand what a rule of law system is.
2. Explore the U.S. rule of law system.

When you hear the term “rule of law,” what comes to mind? It may seem like an ambiguous term, but it is used frequently in legal and governance circles. [Rule of law](#) is a system of laws under which the people and the government are bound, which allows predictability and restraint of government action.

A rule of law legitimizes the law. It establishes clear rules of behavior, establishes (or captures) precedent, and seriously undermines any defense of ignorance of the law. Moreover, it holds people to the same standards, though in many ancient rules of law, the standards differed depending on the person’s classification. For instance, men often had different rights than women. Slaves were a different legal class than those who were free, and indentured servants were often a different classification altogether. When people are held to the same standards, we can see systems of fairness (that is, equal justice under the law) emerging, at least for those within the same class.

The Founding Fathers of the United States did not create our rule of law system out of thin air. Many rule of law systems existed prior to the founding of the United States. The U.S. rule of law system has many similarities with prior rule of law systems from which our Founding Fathers drew their ideas. We can trace elements of our legal genealogy back to ancient Babylon. For example, who has the right to govern, the legitimate sources of law, the organization of government, substantive and procedural legal responsibilities, processes for dispute resolution, and consequences for legal transgressions are all common foci for rule of law systems.

Can you imagine if we had no way to determine these things? Imagine that we did not know who had the legitimate right to govern or that we did not know which sources of law were legitimate. If we did not have a rule of law system that specified and legitimized these and other foundational issues, chaos would rule. There would likely be competing claims of authority between different factions of power if our U.S. Constitution and our state constitutions did not create our systems of government. Likewise, there would be competing sources of law—such as those based on religious texts, or others created by modern human beings—if our constitutions did not legitimize the manner in which laws were to be created. Also, there would be different methods of dispute resolution. Perhaps some people would favor a vigilante system, while others would prefer a procedural system. This type of unpredictability would result in a very unstable society. We should not take the American rule of law system for granted. It provides predictability and stability to our lives.

Rule of law systems establish authority, create expectations for behavior, and establish redress for grievances and penalties for deviance. Governance of conflict and the attainment of peace among the governed are primary goals of rule of law systems. For example, securing peace is a goal within the U.S. rule of law system. The U.S. Constitution’s preamble states, “We the People...in Order to...insure domestic Tranquility.” We see this same notion in the [English Bill of Rights of 1689](#), though the *words used are somewhat different*.

According to many rule of law systems, the attainment of peace relies on the establishment of a hierarchical authority structure. This recognition of the right to govern provides legitimacy. For instance, in the [Code of Hammurabi](#) and the [Magna Carta](#), these rights are derived from religious authority. In the U.S. Constitution and the English Bill of Rights of 1689, the power is derived from the people.

Note the difference between power and authority. Power is the ability to make someone behave in a predictable manner. Authority draws its strength from legitimacy. Imagine that your friend told you that his mother granted him the right to govern others. Would you believe him? Probably not. Why? Because it is unlikely that you would recognize your friend’s mother as having a legitimate authority to bestow the right to govern on anyone, including your friend. Imagine, instead, the governor of your state. You probably recognize the authority of the governor to govern, because you recognize that the people, through representative government, have the authority to elect the governor to do so.

The rule of law of the federal government in the United States is composed of many different sources of law, including constitutional law, statutory law, rules and regulations promulgated by administrative agencies, federal common law, and treaties. Additionally, within the United States, several state and local jurisdictions exist, each having its own rule of law systems. Moreover, the U.S. system of governance is one of federalism, which allows different rule of law systems to operate side by side. In the United States, these systems are the federal government and the state governments.

Organizational structures for government—including who has the right to govern—are also set out in rule of law systems. For instance, the Code of Hammurabi identified a ruler: Hammurabi himself. The English Bill of Rights of 1689 required representative bodies. The U.S. Constitution organized the U.S. government by creating the legislative, executive, and judicial branches. These models minimally provide order and, in some cases, provide opportunities for the governed to participate in government, both of which create role expectations of the governed.

Notably, even though our Founding Fathers relied on prior rule of law systems when creating our Constitution, they were unable to resolve all challenges that exist when people live together. Today, for instance, one unresolved challenge is reflected in the tension between personal liberty and responsibility to state. We have many individual rights and personal liberties, but as some argue, we do not have many responsibilities to the state. We could have a system that requires greater duties—such as the legal duty to vote, to serve in public office or in the military, or to maintain public lands. Unresolved challenges highlight the fact that rule of law systems are not perfect systems of governance. Nevertheless, these systems create expectations for conduct, without which governance of conflict could not reasonably exist and peace could not be attained.

The [U.S. Constitution](#) is the foundation on which the U.S. federal rule of law system rests. It asserts the supremacy of law. “We the people” is a very important part of the preamble, because it confers power on the people as well as on the states. Notably, unlike the Magna Carta and the English Bill of Rights of 1689, it does not focus on individual rights. Of course, the Bill of Rights does focus on individual rights, but those amendments were passed after the Constitution was written. (That is why they are called *amendments* to the constitution.) The U.S. Constitution implemented the supremacy of law using structure and processes. The Founding Fathers were particularly concerned about giving the government the power to do its job without encouraging tyranny. They built in processes to ensure the supremacy of law. Indeed, ours is “a government of laws and not of men,” John Adams wrote in the Massachusetts Constitution. Thomas Paine noted the same sentiment in *Common Sense*, when he wrote, “the law is king.”

KEY TAKEAWAYS

Rule of law is a system of published laws under which the people and the government are bound, which allows predictability and restraint of government action. A rule of law system allows people to understand what is expected of them. It provides a system that allows many people with different beliefs and cultures to live together in peace, by providing methods by which conflicts can be resolved. The U.S. rule of law system contains many elements of prior rule of law systems.

EXERCISES

1. View the Code of Hammurabi at <http://avalon.law.yale.edu/ancient/hamframe.asp>. Scroll down slightly until you see the subheading “Code of Laws.” Find three laws that you believe are similar to laws that we have in the United States.
2. Given the long history of rule of law systems, why hasn’t any rule of law system been developed that resolves all problems? Name three social problems that our rule of law system does not address, or does not address adequately.
3. Are the Ten Commandments a rule of law system? How many of the Ten Commandments are illegal in your state today?
4. What problems would exist without a rule of law?
5. How does the rule of law affect business?
