Human resource management is an area that has evolved a great deal over the last few decades. From the days of the very tactical “personnel” management to the current and more strategic state of human resources, businesses and HR professionals alike have changed the way they see the function. In the current economy, human capital assets (i.e., people) are the greatest value creators. Companies compete for talent, and they distinguish themselves in their business performance by the talent they have in their ranks. Human resource management, therefore, becomes a key lever companies can utilize to find, recruit, develop, and grow talent for competitive advantage. This chapter discusses the value and benefits that human resource management brings to an organization, as well as the challenges that the function still faces as a strategic partner to the business.
