

TABLE OF CONTENTS

Licensing

1: The Basics of Quantum Mechanics

- 1.1: Why Quantum Mechanics is Necessary
- 1.2: The Schrödinger Equation and Its Components
- 1.3: The Born-Oppenheimer Approximation
- 1.4: Free Particle Motions in More Dimensions

2: Model Problems That Form Important Starting Points

- 2.1: Free Electron Model of Polyenes
- 2.2: Bands of Orbitals in Solids
- 2.3: Densities of States in 1, 2, and 3 dimensions
- 2.4: Hückel or Tight Binding Theory
- 2.5: Hydrogenic Orbitals
- 2.6: Electron Tunneling
- 2.7: Angular Momentum
- 2.8: Rotations of Molecules
- 2.9: Vibrations of Molecules

3: Characteristics of Energy Surfaces

- 3.1: Strategies for Geometry Optimization and Finding Transition States
- 3.2: Normal Modes of Vibration
- 3.3: Intrinsic Reaction Paths

4: Some Important Tools of Theory

- 4.1: Perturbation Theory
- 4.2: The Variational Method
- 4.3: Linear Variational Method
- 4.4: Point Group Symmetry
- 4.5: Character Tables
- 4.6: Time Dependent Perturbation Theory

5: An Overview of Theoretical Chemistry

- 5.1: What is Theoretical Chemistry About?
- 5.2: Molecular Structure- Theory and Experiment
- 5.3: Chemical Change

6: Electronic Structure

- 6.1: Theoretical Treatment of Electronic Structure
- 6.2: Orbitals
- 6.3: The Hartree-Fock Approximation
- 6.4: Deficiencies in the Single Determinant Model
- 6.5: Various Approaches to Electron Correlation
- 6.6: The Slater-Condon Rules
- 6.7: Molecules Embedded in Condensed Media

- [6.8: High-End Methods for Treating Electron Correlation](#)
- [6.9: Experimental Probes of Electronic Structure](#)
- [6.10: Molecular Orbitals](#)

7: Statistical Mechanics

- [7.1: Collections of Molecules at or Near Equilibrium](#)
- [7.2: Monte Carlo Evaluation of Properties](#)
- [7.3: Molecular Dynamics Simulations](#)
- [7.4: Time Correlation Functions](#)
- [7.5: Some Important Applications of Statistical Mechanics](#)

8: Chemical Dynamics

- [8.1: Theoretical Tools for Studying Chemical Change and Dynamics](#)
- [8.2: Experimental Probes of Reaction Dynamics](#)

9: Exercises

- [9.1: Solutions](#)
