

Index

A

affinity chromatography

[3.4.1. Affinity Chromatography](#)

allosteric competitive inhibition

[7.1: Control of Metabolism Through Enzyme Regulation](#)

Alzheimer's disease

[2.4: Protein Folding and Prions](#)

amino acids

[1.1: Nomenclature of Amino acids](#)

B

Blaber

[1.3.2. Stereochemistry of Amino Acids](#)

C

Cell Disruption

[3.2: Cell Disruption](#)

citric acid cycle

[9: Glycolysis and Gluconeogenesis](#)

competitive inhibition

[7.1: Control of Metabolism Through Enzyme Regulation](#)

D

Denaturation

[2.5: Denaturation of proteins](#)

DNA repair

[12: The Flow of Genetic Information: from DNA to RNA and Proteins](#)

E

Edman degradation

[2.2: Protein Sequencing](#)

Enzyme Regulation

[7.1: Control of Metabolism Through Enzyme Regulation](#)

F

Fractionation

[3.3: Cell Fractionation and Centrifugation](#)

G

gel electrophoresis

[3.5: Electrophoresis](#)

Gel Exclusion Chromatography

[3.4.2. Gel Exclusion Chromatography](#)

gel filtration chromatography

[3.4.2. Gel Exclusion Chromatography](#)

gluconeogenesis

[9: Glycolysis and Gluconeogenesis](#)

glycolysis

[9: Glycolysis and Gluconeogenesis](#)

H

HIV

[13: Integrated chapter \(HIV\)](#)

[13.3: HIV vaccine](#)

HIV gp120

[13.3: HIV vaccine](#)

HIV vaccine

[13: Integrated chapter \(HIV\)](#)

[13.3: HIV vaccine](#)

I

Ion Exchange Chromatography

[3.4.3. Ion Exchange Chromatography](#)

Isoelectric focusing

[3.5: Electrophoresis](#)

isoelectric point

[1.4.2. Acid-Base Reactions of Amino Acids](#)

K

Krebs cycle

[9: Glycolysis and Gluconeogenesis](#)

L

lagging strand

[12.2: DNA Replication](#)

leading strand

[12.2: DNA Replication](#)

Lysis

[3.2: Cell Disruption](#)

N

Noncompetitive Inhibition

[7.1: Control of Metabolism Through Enzyme Regulation](#)

northern blot

[3.5.1: Blotting](#)

O

oxidative phosphorylation

[9: Glycolysis and Gluconeogenesis](#)

P

pentose phosphate pathway

[9: Glycolysis and Gluconeogenesis](#)

peptide bond

[1.2: Structure of Amino Acids](#)

Phosphorylation

[11: Electron Transport Chain and Oxidative Phosphorylation](#)

polysaccharide

[8.5: Polysaccharides](#)

protein folding

[2.4: Protein Folding and Prions](#)

R

Renaturation

[2.5: Denaturation of proteins](#)

replication

[12.2: DNA Replication](#)

repressible system

[7: Regulation of Enzyme Activity](#)

Repressors

[7: Regulation of Enzyme Activity](#)

RNA

[12.4: RNA](#)

S

Sonication

[3.2: Cell Disruption](#)

Southern blot

[3.5.1: Blotting](#)

stop codons

[12.6: Translation](#)

T

transcription

[12: The Flow of Genetic Information: from DNA to RNA and Proteins](#)

translation

[12: The Flow of Genetic Information: from DNA to RNA and Proteins](#)

W

Western blot

[3.5.1: Blotting](#)
