

## Index

### A

Agostic alkyls

[7.1: Transition Metal Alkyl Complexes](#)

### B

Bridging hydrides

[7.2: Metal Hydrides](#)

### C

Carbene insertion

[6.2: Synthesis and Stability](#)

concerted      3-centered      associative  
mechanism

[10.1: Oxidative Addition and Reductive Elimination](#)

### D

Dewar–Chatt model

[9.1: Metal Alkene Complexes](#)

Dialkylmercury

[5.2: Organometallic Compounds of Mercury](#)

### F

Fischer carbyne

[13.2: Metal-Carbynes](#)

### G

Grubb's catalyst

[14.1: Catalytic Applications of Organometallic Compounds- Alkene Metathesis](#)

### H

hydroformylation reaction

[11.2: Homogeneous Catalysis - II](#)

Hydrometallation

[2.1: General Methods of Preparation](#)

### M

Mercury poisoning

[5.2: Organometallic Compounds of Mercury](#)

Metal Carbonyls

[8.1: Metal Carbonyls](#)

metal hydrides

[7.2: Metal Hydrides](#)

### O

olefin polymerization

[3.4: Zeigler Natta Polymerization Catalysts](#)

organoarsenic compounds

[4.1: Organometallic Compounds of As\(V\) and Sb\(V\)](#)

[5.1: Organometallic Compounds of Zinc and Cadmium](#)

Organogermanium Compounds

[3.5: Organosilicon and Organogermanium Compounds](#)

Organosilicon Compounds

[3.5: Organosilicon and Organogermanium Compounds](#)

Oxidative addition

[10.1: Oxidative Addition and Reductive Elimination](#)

### R

Reductive elimination

[10.1: Oxidative Addition and Reductive Elimination](#)

### S

Schrock carbynes

[13.2: Metal-Carbynes](#)

Schrock's catalyst

[14.1: Catalytic Applications of Organometallic Compounds- Alkene Metathesis](#)

### T

Transmetallation

[2.1: General Methods of Preparation](#)

### U

umpolung reactions

[9.1: Metal Alkene Complexes](#)

### Z

Zeigler Natta Polymerization

[3.4: Zeigler Natta Polymerization Catalysts](#)

Zeise's salt

[9.1: Metal Alkene Complexes](#)
