

TABLE OF CONTENTS

Licensing

1: Monomers and Polymers

- 1.1: Difunctional Carboxyloids
- 1.2: Cyclic Carboxyloids
- 1.3: Olefins
- 1.4: Cyclic Olefins
- 1.5: Coordination Polymers
- 1.6: Supramolecular Assemblies
- 1.7: Other Polymers
- 1.8: Polymer Topology
- 1.E: Solutions for Selected Problems

2: Synthetic Methods in Polymer Chemistry

- 2.1: Ziegler-Natta Polymerization
- 2.2: Solutions to Selected Problems
- 2.3: Step Growth and Chain Growth
- 2.4: Cationic Polymerization
- 2.5: Living Cationic Polymerization
- 2.6: Anionic Polymerization
- 2.7: Living Anionic Polymerization
- 2.8: Ring-Opening Polymerization
- 2.9: Radical Polymerization
- 2.10: Living Radical Polymerization- RAFT
- 2.11: Living Radical Polymerization- ATRP

3: Kinetics and Thermodynamics of Polymerization

- 3.1: Thermodynamics of Polymerization
- 3.2: Kinetics of Step-Growth Polymerization
- 3.3: Kinetics of Chain Polymerization
- 3.4: Kinetics of Catalytic Polymerization
- 3.5: Solutions to Selected Problems

4: Polymer Properties

- 4.1: Molecular Weight of Polymers
- 4.2: Viscosity of Polymers
- 4.3: Rheology
- 4.4: Glass Transition
- 4.5: Crystallinity in Polymers
- 4.6: Microphase Separation
- 4.7: Stress-Strain Relationships
- 4.8: Storage and Loss Modulus
- 4.9: Modulus, Temperature, Time
- 4.10: Chapter Solutions
