

Index

A

Angular Overlap Method

[1.14: Angular Overlap Method and M-L Diatomics](#)

B

band theory

[1.9: Band Theory in Solids](#)

C

character table

[1.3: Irreducible Representations and Character Tables](#)

D

delocalization energy

[1.7: Hückel Theory 2 \(Eigenvalues\)](#)

direct product

[1.1: Symmetry Elements and Operations](#)

E

Extended Hückel Theory (EHT)

[1.6: LCAO and Hückel Theory 1 \(Eigenfunctions\)](#)

H

Hückel determinant

[1.8: N-dimensional cyclic systems](#)

Hückel theory

[1.6: LCAO and Hückel Theory 1 \(Eigenfunctions\)](#)

[1.8: N-dimensional cyclic systems](#)

I

irreducible representations

[1.3: Irreducible Representations and Character Tables](#)

L

linear combination of atomic orbitals (LCAOs)

[1.6: LCAO and Hückel Theory 1 \(Eigenfunctions\)](#)

P

point groups

[1.4: Molecular Point Groups 1](#)

S

semiconductor

[1.9: Band Theory in Solids](#)

space groups

[1.4: Molecular Point Groups 1](#)

symmetry element

[1.1: Symmetry Elements and Operations](#)

symmetry operation

[1.1: Symmetry Elements and Operations](#)

Z

zero differential overlap approximation

[1.6: LCAO and Hückel Theory 1 \(Eigenfunctions\)](#)
