

## Index

### B

#### biomimetic strategy

- 4.6: Biosynthesis and Total Syntheses of Diterpenes - Spatol
- 5.1: Orselenic Acid

### C

#### carbon fixation

- 2.1: Carbon Fixation - Biosynthesis of Sugars

#### Cecropia juvenile hormones

- 4.5: Homo and Bishomo Sesquiterpenes ii Cecropia Juvenile Hormones

#### cephalotaxine

- 6.2: Cephalotaxine

#### colchicine

- 6.1: Colchicine

#### common atoms

- 4.4: Syntheses of Longifolene

### D

#### decarboxylative elimination

- 4.1: Biosynthesis of Monoterpenes - Loganin

### E

#### erythronolide B

- 5.4: Erythronolide B

#### exendo bonds

- 5.3: Tetracyclines

### F

#### fatty acids

- 3.1: Biosynthesis of Fatty Acids

#### fusion bond

- 5.3: Tetracyclines

### G

#### griseofulvin

- 5.2: Griseofulvin

### I

#### internal electrophile

- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors

#### isoprene units

- 4.1: Biosynthesis of Monoterpenes - Loganin

### L

#### lanosterol

- 4.7: Biosynthesis and Total Synthesis of Steroids

#### levuglandins

- 3.7: Levuglandins

#### loganin

- 4.1: Biosynthesis of Monoterpenes - Loganin
- 4.2: Syntheses of Loganin

#### longifolene

- 4.3: Biosynthesis of Sesquiterpenes - Longifolene

#### lycopodine

- 6.7: Lycopodine

### M

#### morphine

- 6.3: Morphine

### O

#### orselenic acid

- 5.1: Orselenic Acid

### P

#### polyketides

- 5: Polyketides

#### prostaglandins

- 3.2: Biosynthesis of Prostaglandins

### Q

#### quinine

- 6.5: Quinine

### R

#### ring expansion

- 4.4: Syntheses of Longifolene

#### ring size modification

- 4.4: Syntheses of Longifolene

#### RuBisCo

- 2.1: Carbon Fixation - Biosynthesis of Sugars

### S

#### sesquiterpenes

- 4.3: Biosynthesis of Sesquiterpenes - Longifolene

#### spatol

- 4.6: Biosynthesis and Total Syntheses of Diterpenes - Spatol

#### stereoelectronic control

- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors

#### steric approach control

- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors

#### strategic bond

- 5.3: Tetracyclines

### T

#### temporary bridge

- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors

#### tetracyclines

- 5.3: Tetracyclines

#### thermodynamic control

- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors
