

# TABLE OF CONTENTS

## Licensing

### 1: Some Principles of Synthetic Planning

- 1.1: Introduction
- 1.2: Logic Centered Analysis
- 1.3: Perception of Structure-Functionality Relationships
- 1.4: Polar Reactivity Analysis
- 1.5: A Protocol for Synthetic Design
- 1.6: Terminology
- 1.7: Study Questions
- 1.8: References

### 2: Sugars - Biosynthetic Starting Materials

- 2.1: Carbon Fixation - Biosynthesis of Sugars
- 2.2: Synthesis of Sugars
- 2.3: Acetyl CoA - a Sugar-Derived Starting Material
- 2.4: Terminology
- 2.5: Study Questions
- 2.6: References

### 3: Fatty Acids and Prostaglandins

- 3.1: Biosynthesis of Fatty Acids
- 3.2: Biosynthesis of Prostaglandins
- 3.3: Syntheses of Prostaglandins from Acyclic Precursors
- 3.4: Syntheses of Prostaglandins from Polycyclic Precursors
- 3.5: Syntheses of Prostaglandins from Cyclopentanes
- 3.6: Enantioselective Syntheses of Prostaglandins
- 3.7: Levuglandins
- 3.8: Terminology
- 3.9: Study Questions
- 3.10: References

### 4: Terpenes

- 4.1: Biosynthesis of Monoterpenes - Loganin
- 4.2: Syntheses of Loganin
- 4.3: Biosynthesis of Sesquiterpenes - Longifolene
- 4.4: Syntheses of Longifolene
- 4.5: Homo and Bishomo Sesquiterpenes ii Cecropia Juvenile Hormones
- 4.6: Biosynthesis and Total Syntheses of Diterpenes - Spatol
- 4.7: Biosynthesis and Total Synthesis of Steroids
- 4.8: Terminology
- 4.9: Study Questions
- 4.10: References

## 5: Polyketides

- [5.1: Orselenic Acid](#)
- [5.2: Griseofulvin](#)
- [5.3: Tetracyclines](#)
- [5.4: Erythronolide B](#)
- [5.5: Terminology](#)
- [5.6: Study Questions](#)
- [5.7: References](#)

## 6: Amino Acids and Alkaloids

- [6.1: Colchicine](#)
- [6.2: Cephalotaxine](#)
- [6.3: Morphine](#)
- [6.4: Lysergic Acid](#)
- [6.5: Quinine](#)
- [6.6: Biosynthesis of Nonaromatic Amino Acids](#)
- [6.7: Lycopodine](#)
- [6.8: Terminology](#)
- [6.9: Study Questions](#)
- [6.10: References](#)
