

7.1 Definitions in Thermochemistry (Video)

This project was preformed to supply **Libretext Authors** with videos on General Chemistry topics which can be used to enhance their projects. Also, these videos are meant to act as a learning resource for **all General Chemistry students**.

Video Topics

Thermochemistry is the branch of chemistry concerned with heat effects accompanying chemical reactions. Focuses on the system's transfer of energy between a system and its surroundings. The system is the part of the universe chosen for study and the surroundings are the rest of the universe outside the system. Heat: energy transferred between a system and its surroundings as a result of temperature difference. This video contains a detailed discussion on these and other definitions.
