

19.7.5 pH After the Equivalence Point in a Strong Acid/Strong Base Titration (Video)

This project was preformed to supply **Libretext authors** with videos on General Chemistry topics which can be used to enhance their projects. Also, these videos are meant to act as a learning resource for **all General Chemistry students**.

Video Topics

This video contains an example where the pH just after equivalence point of a strong acid / strong base titration is calculated.

You start with 50.0 mL of a 0.100 M solution of HCl.

Calculate the pH after the addition of 51 mL of a 0.100 M NaOH solution:
