

Chapter 5.3 Calculations Involving Molarity (Video)

This project was preformed to supply **Libretext Authors** with videos on General Chemistry topics which can be used to enhance their projects. Also, these videos are meant to act as a learning resource for **all General Chemistry students**.

Video Topics

Remember a solute is dissolved in a solvent to produce a solution. So, If NaCl is dissolved in water to create a solution: NaCl is the solute and Water is the solvent. Molarity is a measure of the concentration of a solute in a solution. Molarity is abbreviated M. The units are M or mol of solute / Liters of solution.
