

TABLE OF CONTENTS

Preface to the Reader

Licensing

To the Student

Introduction to the Course

Chapter 1: Atoms

- 1.1: What Do You Think You Know About Atoms?
- 1.2: Atomic Realities and Scientific Theories
- 1.3: Some History of Atomic Theory
- 1.4: Identifying and Isolating Elements
- 1.5: Evidence for Atoms
- 1.6: The Divisible Atom
- 1.7: Interactions Between Atoms and Molecules
- 1.8: Interactions Between Helium Atoms and Hydrogen Molecules
- 1.9: In-Text References

Chapter 2: Electrons and Orbitals

- 2.1: Light and Getting Quantum Mechanical
- 2.2 Taking Quanta Seriously
- 2.3: Exploring Atomic Organization Using Spectroscopy
- 2.4: Beyond Bohr
- 2.5: Organizing Elements: Introduction to the Periodic Table
- 2.6: Orbitals, Electron Clouds, Probabilities, and Energies
- 2.7: Quantum Numbers
- 2.8: In-Text References

Chapter 3: Elements, Bonding, and Physical Properties

- 3.1: Elements and Bonding
- 3.2: Elements and Their Interactions
- 3.3: Carbon: An Amazingly Allotropic Element
- 3.4: Metals
- 3.5: In-Text References

Chapter 4: Heterogeneous Compounds

- 4.1: 3D and 2D Representations
- 4.2: Single Bonds and Molecular Shape
- 4.3: Double and Triple Bonds
- 4.4: Bonding in Nitrogen, Oxygen, and Fluorine
- 4.5: Molecular Shapes, Polarity, and Molecular Interactions
- 4.6: Ionic Bonding
- 4.7: In-Text References

Chapter 5: Systems Thinking

- 5.1: Temperature
- 5.2: Thinking About Populations of Molecules
- 5.3: Vibrating, Bending, and Rotating Molecules
- 5.4: Open Versus Closed Systems
- 5.5: Thermodynamics and Systems
- 5.6: Back to Phase Changes
- 5.7: Gibbs (Free) Energy to the Rescue
- 5.8: In-Text References

Chapter 6: Solutions

- 6.1: What Is A Solution?
- 6.2: Solubility: why do some things form solutions and others not?
- 6.3: Hydrogen Bonding Interactions and Solubility
- 6.4: Gibbs Energy and Solubility
- 6.5: Polarity
- 6.6: Temperature and Solubility
- 6.7: In-Text References

Chapter 7: A Field Guide to Chemical Reactions

- 7.1: Collisions and Chemical Reactions
- 7.2: Acid-Base Reactions: A Guide for Beginners
- 7.3: Lewis Acid-Base Reactions
- 7.4: Nucleophiles and Electrophiles
- 7.5: Oxidation-Reduction Reactions
- 7.6: Energy Changes and Chemical Reactions
- 7.7: In-Text References

Chapter 8: How Far? How Fast?

- 8.1: What Factors Control Reactions
- 8.2: Reaction Rates
- 8.3: Kinetics and the Mechanisms of Reactions
- 8.4: Catalysis
- 8.5: Equilibrium
- 8.6: Back to Reaction Mechanisms
- 8.7: In-Text References

Chapter 9: Reaction Systems

- 9.1: Systems Composed of One Reaction
- 9.2: Buffered Systems
- 9.3: Amino Acids, Proteins, and pH
- 9.4: Coupled, Non-Equilibrium Reaction Systems
- 9.5: Energetics and Coupling
- 9.6: In-Text References

Chapter 10: Appendix- Spectroscopy

- 10.1: In-Text References
