

# TABLE OF CONTENTS

Licensing

Dedicated to Mr. Frank Reidy, a philanthropist who brought the author to the US

Note for instructors and acknowledgments

## 1: Chemical Principles

- 1.1: Solubility
- 1.2: Solubility equilibria
- 1.3: Varying solubility of ionic compounds
- 1.4: pH Buffers
- 1.5: Separation of cations in groups

## 2: Experimental techniques

- 2.1: Precipitation
- 2.2: Water bath
- 2.3: Centrifugation
- 2.4: Separation of the precipitate
- 2.5: pH measurement
- 2.6: Flame test
- 2.7: Common qualitative analysis reagents, their effects, and hazards

## 3: Group I cations

- 3.1: Separation of group I cations
- 3.2: Separation and confirmation of individual ions in group I precipitates
- 3.3: Procedure, flowchart, and datasheets for separation and confirmation of group I cations

## 4: Group II cations

- 4.1: Precipitation of group II cations
- 4.2: Separation and confirmation of individual ions in group II precipitates
- 4.3: Procedure, flowchart, and datasheets for separation and confirmation of group II cations

## 5: Group III cations

- 5.1: Separation of group III cations
- 5.2: Separation and confirmation of individual ions in group III precipitates
- 5.3: Procedure, flowchart, and datasheets for separation and confirmation of group III cations

## 6: Group IV and Group V cations

- 6.1: Separating group IV cations
- 6.2: Separation and confirmation of individual ions in group IV precipitates and group V mixture
- 6.3: Procedure, flowchart, and datasheets for separation and confirmation of group IV and group V cations
