

## Index

### A

anisotropic hyperfine coupling tensor  
4.1: Physical origin of the hyperfine interaction

### D

Davies ENDOR

8.1: ENDOR

DEER

9.2: DEER

DMPO

10.2: Spin traps

double electron electron resonance

9.2: DEER

### E

electron nuclear double resonance

8.1: ENDOR

electron spin echo envelope modulation

8.2: ESEEM and HYSCORE

ENDOR

8.1: ENDOR

ESEEM

8.2: ESEEM and HYSCORE

exchange Hamiltonian

5.1: Exchange interaction

exchange interaction

5.1: Exchange interaction

### F

Fermi contact

4.1: Physical origin of the hyperfine interaction

### H

hyperfine Hamiltonian

4.2: Hyperfine Hamiltonian

hyperfine interaction

4.1: Physical origin of the hyperfine interaction

Hyperfine sublevel correlation

8.2: ESEEM and HYSCORE

HYSCORE

8.2: ESEEM and HYSCORE

### K

Kramers ions

5.3: Zero-field interaction

Kramers' theorem

5.3: Zero-field interaction

### M

McConnell equation

4.1: Physical origin of the hyperfine interaction

### N

nitroxide radicals

10.1: Nitroxide spin probes and labels

### P

PBN

10.2: Spin traps

PELDOR

9.2: DEER

phenylbutylnitron

10.2: Spin traps

PROXYL

10.1: Nitroxide spin probes and labels

pulsed electron electron double resonance

9.2: DEER

### R

reactive oxygen species

10.2: Spin traps

### S

secular hyperfine coupling

4.2: Hyperfine Hamiltonian

spin density

4.1: Physical origin of the hyperfine interaction

spin label

10.1: Nitroxide spin probes and labels

spin packet

7.2: Theoretical description of CW EPR

spin polarization

4.1: Physical origin of the hyperfine interaction

spin probe

10.1: Nitroxide spin probes and labels

spin trap

10.2: Spin traps

### T

TEMPO

10.1: Nitroxide spin probes and labels
