- Introduction to General Chemistry (Malik) — *Public Domain*
 - Front Matter — *Undeclared*
 - TitlePage — *Undeclared*
 - InfoPage — *Undeclared*
 - Table of Contents — *Undeclared*
 - Dedication — *Public Domain*
 - Licensing — *Undeclared*
 - 1: Matter energy and their measurements — *Public Domain*
 - 1.1: Matter and energy — *Public Domain*
 - 1.2: What is chemistry? — *Public Domain*
 - 1.3: Measurements — *Public Domain*
 - 1.4: Significant Figures — *Public Domain*
 - 1.5: Unit conversions — *Public Domain*
 - 1.6: Equations and graphs — *Public Domain*
 - 1.7: Density and specific gravity measurements — *Public Domain*
 - 1.8: Heat and its measurements — *Public Domain*
 - 1.9: Heat and changes in physical states of matter — *Public Domain*
 - 2: Elements — *Public Domain*
 - 2.1: Dalton's atomic theory — *Public Domain*
 - 2.2: Subatomic particles and a modern view of an atom — *Public Domain*
 - 2.3: Atoms of elements — *Public Domain*
 - 2.4: The periodic table — *Public Domain*
 - 2.5: Electrons in atoms — *Public Domain*
 - 2.6: The periodic trends in properties of the elements — *Public Domain*
 - 3: Compounds — *Public Domain*
 - 3.1: Bonding in compounds — *Public Domain*
 - 3.2: Naming binary ionic compounds — *Public Domain*
 - 3.3: Polyatomic ions and their compounds — *Public Domain*
 - 3.4: Naming acids — *Public Domain*
 - 3.5: Naming binary covalent compounds — *Public Domain*
 - 3.6: Lewis structures of molecules — *Public Domain*
 - 3.7: Molecular shapes –Valence shell electron pair repulsion (VSEPR) theory — *Public Domain*
 - 3.8: Polarity of molecules — *Public Domain*
 - 3.9: Intramolecular forces and intermolecular forces — *Public Domain*
 - 4: Stoichiometry –the quantification of chemical reactions — *Public Domain*
 - 4.1: Stoichiometry — *Public Domain*
 - 4.2: The mole — *Public Domain*
 - 4.3: Chemical reaction — *Public Domain*
 - 4.4: Patterns of chemical reactions — *Public Domain*
 - 4.5: Oxidation-reduction reactions — *Public Domain*
 - 4.6: Energetics of chemical reactions — *Public Domain*
 - 4.7: Stoichiometric calculations — *Public Domain*
 - 5: Solutions — *Public Domain*
 - 5.1: Introduction to solution — *Public Domain*
 - 5.2: Solubility — *Public Domain*
 - 5.3: Electrolytes — *Public Domain*
 - 5.4: Concentration of solutions — *Public Domain*
 - 5.5: Osmosis — *Public Domain*
 - 6: Acids and bases — *Public Domain*
 - 6.1: What is an acid and a base? — *Public Domain*
 - 6.2: Brønsted–Lowry acids and bases — *Public Domain*
 - 6.3: Strength of acids and bases — *Public Domain*
 - 6.4: Acid-base equilibrium — *Public Domain*
 - 6.5: Dissociation of water — *Public Domain*
 - 6.6: The pH — *Public Domain*
 - 6.7: Acid-base reactions — *Public Domain*
 - 6.8: pH Buffers — *Public Domain*
 - 7: Gases — *Public Domain*
 - 7.1: Characteristics of gases — *Public Domain*
 - 7.2: The pressure-volume relationship — *Public Domain*

- 7.3: The temperature-volume relationship — *Public Domain*
- 7.4: The pressure-temperature relationship — *Public Domain*
- 7.5: The combined gas law — *Public Domain*
- 7.6: The volume-amount relationship — *Public Domain*
- 7.7: Ideal gas law — *Public Domain*
- 7.8: Dalton's law of partial pressure — *Public Domain*
- 8: Nuclear chemistry — *Public Domain*
 - 8.1: Introduction to nuclear chemistry — *Public Domain*
 - 8.2: Radioactivity — *Public Domain*
 - 8.3: Half-life of radioisotopes — *Public Domain*
 - 8.4: Radiation measurements — *Public Domain*
 - 8.5: Ionizing radiation exposures — *Public Domain*
 - 8.6: Medical uses of radioisotopes — *Public Domain*
 - 8.7: Making radioisotopes for medical uses — *Public Domain*
 - 8.8: Nuclear fusion and fission — *Public Domain*
