

Index

A

absolute zero

9.2: Relating Pressure, Volume, Amount, and Temperature - The Ideal Gas Law

accuracy

1.5: Measurement Uncertainty, Accuracy, and Precision

acid anhydride

18.4: Structure and General Properties of the Nonmetals

acid ionization

14.1: Brønsted-Lowry Acids and Bases

acid ionization constant

14.3: Relative Strengths of Acids and Bases

acidic

14.2: pH and pOH

Actinide

2.6: The Periodic Table

Actinide series

19.1: Properties of Transition Metals and Their Compounds

activated complex

12.6: Collision Theory

activation energy

12.6: Collision Theory

active electrode

17.2: Galvanic Cells

actual yield

4.5: Reaction Yields

addition reaction

20.2: Hydrocarbons

adhesive force

10.3: Properties of Liquids

alcohol

20.3: Alcohols and Ethers

aldehyde

20.4: Aldehydes, Ketones, Carboxylic Acids, and Esters

alkali metal

2.6: The Periodic Table

alkaline battery

17.5: Batteries and Fuel Cells

alkaline earth metal

2.6: The Periodic Table
18.1: Periodicity

alkane

20.2: Hydrocarbons

alkene

20.2: Hydrocarbons

alkyl group

20.2: Hydrocarbons

alkyne

20.2: Hydrocarbons

Allotropes

18.1: Periodicity

alloy

11.2: The Dissolution Process

alpha decay

21.3: Radioactive Decay

alpha particle

2.3: Evolution of Atomic Theory
21.2: Nuclear Equations

amide

20.5: Amines and Amides

amine

20.5: Amines and Amides

Amonton's law

9.2: Relating Pressure, Volume, Amount, and Temperature - The Ideal Gas Law

Amorphous

18.3: Structure and General Properties of the Metalloids

amorphous solid

10.6: The Solid State of Matter

amphiphilic

11.6: Colloids

amphiprotic

14.1: Brønsted-Lowry Acids and Bases

amphoteric

14.1: Brønsted-Lowry Acids and Bases

amplitude

6.1: Electromagnetic Energy

analyte

4.6: Quantitative Chemical Analysis

angular momentum quantum number

6.3: Development of Quantum Theory

anion

2.4: Atomic Structure and Symbolism

anode

17.2: Galvanic Cells

antimatter

21.2: Nuclear Equations

aqueous solution

3.3: Molarity

aromatic hydrocarbon

20.2: Hydrocarbons

Arrhenius equation

12.6: Collision Theory

atmosphere

9.1: Gas Pressure

atom

1.2: Phases and Classification of Matter

atomic mass

2.4: Atomic Structure and Symbolism

atomic mass unit

2.4: Atomic Structure and Symbolism

atomic number

2.4: Atomic Structure and Symbolism

atomic orbital

6.3: Development of Quantum Theory

aufbau principle

6.4: Electronic Structure of Atoms (Electron Configurations)

autoionization

14.1: Brønsted-Lowry Acids and Bases

average rate

12.2: Chemical Reaction Rates

Avogadro's law

9.2: Relating Pressure, Volume, Amount, and Temperature - The Ideal Gas Law

Avogadro's Number

3.1: Formula Mass and the Mole Concept

axial position

7.7: Molecular Structure and Polarity

B

balanced equation

4.2: Writing and Balancing Chemical Equations

band of stability

21.1: Nuclear Structure and Stability

bar

9.1: Gas Pressure

barometer

9.1: Gas Pressure

base anhydride

18.9: Occurrence, Preparation, and Compounds of Oxygen

base ionization

14.1: Brønsted-Lowry Acids and Bases

base ionization constant

14.3: Relative Strengths of Acids and Bases

Basic

14.2: pH and pOH

battery

17.5: Batteries and Fuel Cells

becquerel (unit)

21.6: Biological Effects of Radiation

beta decay

21.3: Radioactive Decay

beta particle

21.2: Nuclear Equations

bicarbonate anion

18.6: Occurrence, Preparation, and Properties of Carbonates

bidentate ligand

19.2: Coordination Chemistry of Transition Metals

bimolecular reaction

12.7: Reaction Mechanisms

binary acid

2.8: Chemical Nomenclature

binary compound

2.8: Chemical Nomenclature

binding energy per nucleon

21.1: Nuclear Structure and Stability

Bismuth

18.1: Periodicity

blackbody

6.1: Electromagnetic Energy

Bohr's model of the hydrogen atom

6.2: The Bohr Model

boiling point

10.4: Phase Transitions

boiling point elevation

11.5: Colligative Properties

boiling point elevation constant

11.5: Colligative Properties

bomb calorimeter

5.3: Calorimetry

bond angle

7.7: Molecular Structure and Polarity

bond dipole moment

7.7: Molecular Structure and Polarity

bond distance

7.7: Molecular Structure and Polarity

bond energy
