## A

### acid

- 5.11: Acids
- 14.4: Neutralization Reactions
- 14.6: Strong and Weak Acids and Bases and their Salts
- 14.8: The pH Scale
- 17.5: Other Oxygen-Containing Functional Groups

### acid dissociation constant

- 13.6: Some Special Types of Equilibria

### acid salt

- 14.6: Strong and Weak Acids and Bases and their Salts

### acids

- 5.11: Acids

### activity series

- 6.3: Types of Chemical Reactions - Single and Double Replacement Reactions

### Actual Yields

- 7.6: Yields

### addition polymers

- 17.7: Polymers

### addition reaction

- 17.2: Hydrocarbons

### adhesion

- 10.4: Properties of Liquids

### alcohol

- 17.4: Alkyl Halides and Alcohols

### alcohol functional group

- 17.4: Alkyl Halides and Alcohols

### aldehyde

- 17.5: Other Oxygen-Containing Functional Groups

### Aliphatic hydrocarbons

- 17.2: Hydrocarbons

### alkaline battery

- 15.4: Applications of Redox Reactions - Voltaic Cells

### alkanes

- 17.2: Hydrocarbons

### alkenes

- 17.2: Hydrocarbons

### alkyl halides

- 17.4: Alkyl Halides and Alcohols

### alkynes

- 17.2: Hydrocarbons

### alpha particle

- 16.2: Radioactivity

### amide

- 17.6: Other Functional Groups

### amine

- 17.6: Other Functional Groups

### amorphous solid

- 10.5: Solids

### amphiprotic

- 14.3: Brønsted-Lowry Acids and Bases

### analyte

- 14.5: Acid-Base Titrations

### anions

- 5.2: Lewis Electron Dot Diagrams
- 5.3: Ions and Ionic Compounds
- 5.4: Electron Transfer - Ionic Bonds

### aromatic

- 17.2: Hydrocarbons

### aromatic hydrocarbons

- 17.2: Hydrocarbons

### Arrhenius acid

- 14.2: Arrhenius Acids and Bases

### Arrhenius base

- 14.2: Arrhenius Acids and Bases

### Arrhenius definition

- 14.4: Neutralization Reactions

### atmosphere

- 8.3: Pressure

### atomic bomb

- 16.6: Nuclear Energy

### atomic mass

- 3.3: Masses of Atoms and Molecules

### atomic mass unit

- 3.3: Masses of Atoms and Molecules
- 7.3: The Mole

### atomic mass units

- 7.3: The Mole

### atomic theory

- 3.2: Atomic Theory

### atoms

- 3.2: Atomic Theory

### aufbau principle

- 4.9: Aufbau Principle

### autoionization

- 14.7: Autoionization of Water

### autoionization constant of water

- 14.7: Autoionization of Water

### autoionization of water

- 13.6: Some Special Types of Equilibria
- 14.7: Autoionization of Water

### Avogadro's law

- 8.5: Other Gas Laws

### avogadros number

- 7.3: The Mole

## B

### balanced

- 6.2: The Chemical Equation

### balanced chemical equation

- 7.5: Mole-Mass and Mass-Mass Calculations

### base

- 14.4: Neutralization Reactions
- 14.6: Strong and Weak Acids and Bases and their Salts
- 14.8: The pH Scale

### Batteries

- 15.4: Applications of Redox Reactions - Voltaic Cells

### becquerel (unit)

- 16.4: Units of Radioactivity

### beta particle

- 16.2: Radioactivity

### Boiling

- 10.3: Phase Transitions - Melting, Boiling, and Subliming

### boiling point

- 10.3: Phase Transitions - Melting, Boiling, and Subliming

- 11.7: Colligative Properties of Solutions

### boiling point elevation

- 11.7: Colligative Properties of Solutions

### boiling point elevation constant

- 11.7: Colligative Properties of Solutions

### Bond

- 5.8: Other Aspects of Covalent Bonds

### bond energy

- 5.8: Other Aspects of Covalent Bonds

### bonding electron pair

- 5.6: Covalent Bonds

### Boyle's law

- 8.4: Gas Laws

### branched hydrocarbon

- 17.3: Branched Hydrocarbons

### buffer

- 14.9: Buffers

### buffer capacity

- 14.9: Buffers

## C

### calorimeter

- 9.4: Enthalpy and Chemical Reactions

### calorimetry

- 9.4: Enthalpy and Chemical Reactions

### capacity

- 14.9: Buffers

### capillary action

- 10.4: Properties of Liquids

### capillary rise

- 10.4: Properties of Liquids

### carbonyl

- 17.5: Other Oxygen-Containing Functional Groups

### carbonyl group

- 17.5: Other Oxygen-Containing Functional Groups

### carboxylate anion

- 17.5: Other Oxygen-Containing Functional Groups

### carboxylic acids

- 17.5: Other Oxygen-Containing Functional Groups

### catalyst

- 13.4: Shifting Equilibria - Le Chatelier's Principle

### cathode

- 15.4: Applications of Redox Reactions - Voltaic Cells

### cations

- 5.2: Lewis Electron Dot Diagrams
- 5.3: Ions and Ionic Compounds

### central atom

- 5.6: Covalent Bonds

### chain reaction

- 16.6: Nuclear Energy

### Charles's law

- 8.4: Gas Laws

### chemical change

- 1.2: Basic Definitions

### chemical equation

- 6.2: The Chemical Equation
- 7.4: The Mole in Chemical Reactions
- 7.5: Mole-Mass and Mass-Mass Calculations

### chemical equations

- 9.6: Hess's Law

### chemical equilibria

- 13.6: Some Special Types of Equilibria

### chemical equilibrium

- 13.2: Chemical Equilibrium

### chemical properties

- 1.2: Basic Definitions

### chemical reaction

- 13.3: The Equilibrium Constant
- 14.2: Arrhenius Acids and Bases
