

## Detailed Licensing

### Overview

**Title:** [Introduction to Organic and Biochemistry \(Malik\)](#)

**Webpages:** 83

**Applicable Restrictions:** Noncommercial

**All licenses found:**

- [Public Domain](#): 97.6% (81 pages)
- [Undeclared](#): 1.2% (1 page)
- [CC BY-NC-SA 3.0](#): 1.2% (1 page)

### By Page

- [Introduction to Organic and Biochemistry \(Malik\) - Public Domain](#)
  - [Front Matter - Public Domain](#)
    - [TitlePage - Public Domain](#)
    - [InfoPage - Public Domain](#)
    - [Table of Contents - Undeclared](#)
    - [Licensing - Public Domain](#)
    - [Dedication - Public Domain](#)
  - [1: Bonding in organic compounds - Public Domain](#)
    - [1.1: What is organic chemistry? - Public Domain](#)
    - [1.2: What is a chemical bond - Public Domain](#)
    - [1.3: Hybridization of orbitals and 3D structures of simple organic compounds - Public Domain](#)
    - [1.4: Representing organic compounds - Public Domain](#)
    - [1.5: Formal Charge - Public Domain](#)
    - [1.6: Resonance - Public Domain](#)
  - [2: Nomenclature and physical properties of organic compounds - Public Domain](#)
    - [2.1: Hydrocarbons - Public Domain](#)
    - [2.2: Functional group - Public Domain](#)
    - [2.3: Functional groups containing sp<sup>3</sup>-hybridized heteroatom - Public Domain](#)
    - [2.4: Functional groups containing sp<sup>2</sup>-hybridized heteroatom - Public Domain](#)
    - [2.5: Functional groups containing mix of sp<sup>3</sup>- and sp<sup>2</sup>-, or sp-hybridized heteroatom - Public Domain](#)
  - [3: Stereochemistry - Public Domain](#)
    - [3.1: Introduction to stereochemistry - Public Domain](#)
    - [3.2: Confirmations - Public Domain](#)
    - [3.3: Configurations - Public Domain](#)
  - [4: Organic reactions - Public Domain](#)
    - [4.1: What is a reaction mechanism - Public Domain](#)
    - [4.2: Free Radical Reactions - Public Domain](#)
    - [4.3: Acid-base reactions - Public Domain](#)
    - [4.4: Nucleophilic substitution and elimination reactions - Public Domain](#)
    - [4.5: Nucleophilic acyl substitution reactions - Public Domain](#)
    - [4.6: Nucleophilic Addition Reactions - Public Domain](#)
    - [4.7: Electrophilic addition reactions - Public Domain](#)
    - [4.8: Electrophilic aromatic substitution reactions - Public Domain](#)
    - [4.9: Reduction and oxidation \(redox\) reactions - Public Domain](#)
    - [4.10: Reactions with cyclic transition state - Public Domain](#)
  - [5: Carbohydrates - Public Domain](#)
    - [5.1: What are carbohydrates - Public Domain](#)
    - [5.2: General class names and Common names of monosaccharides - Public Domain](#)
    - [5.3: Cyclic structures of monosaccharides - Public Domain](#)
    - [5.4: Reactions of monosaccharides - Public Domain](#)
    - [5.5: Disaccharides - Public Domain](#)
    - [5.6: Oligosaccharides - Public Domain](#)
    - [5.7: Polysaccharides - Public Domain](#)
  - [6: Lipids - Public Domain](#)
    - [6.1: What are lipids? - Public Domain](#)
    - [6.2: Fatty acyls - Public Domain](#)
    - [6.3: Glycerolipids - Public Domain](#)
    - [6.4: Glycerophospholipids - Public Domain](#)
    - [6.5: Sphingolipids - Public Domain](#)
    - [6.6: Saccharolipids, polyketides, and prenols - Public Domain](#)
    - [6.7: Sterols - Public Domain](#)
    - [6.8: Cell membrane - Public Domain](#)
  - [7: Proteins - Public Domain](#)
    - [7.1: What are proteins? - Public Domain](#)
    - [7.2: Amino acids - Public Domain](#)

- 7.3: Primary structure of proteins - *Public Domain*
- 7.4: Secondary structure of proteins - *Public Domain*
- 7.5: Tertiary structure of proteins - *Public Domain*
- 7.6: Quaternary structure of proteins - *Public Domain*
- 7.7: Summary of protein structure levels - *Public Domain*
- 7.8: Protein misfolding and denaturation - *Public Domain*
- 7.9: Enzymes - *Public Domain*
- 8: Nucleic acids - *Public Domain*
  - 8.1: Nucleotides -the building blocks of nucleic acids - *Public Domain*
  - 8.2: Primary structure of deoxyribonucleic acid (DNA) - *Public Domain*
  - 8.3: Secondary structure and replication of DNA - *Public Domain*
  - 8.4: Ribonucleic acid (RNA) and transcription - *Public Domain*
- 8.5: Translation-Protein Synthesis - *Public Domain*
- 8.6: Mutations and Genetic Diseases - *Public Domain*
- 8.7: Viruses - *Public Domain*
- 8.8: Genetic engineering - *Public Domain*
- 9: Food to energy metabolic pathways - *Public Domain*
  - 9.1: Basics of metabolism - *Public Domain*
  - 9.2: Digestion of food - *Public Domain*
  - 9.3: Oxidation of glucose -the glycolysis - *Public Domain*
  - 9.4: Citric acid cycle - *Public Domain*
  - 9.5: Oxidative Phosphorylation - *Public Domain*
  - 9.6: Oxidation of fatty acids - *Public Domain*
  - 9.7: Degradation of amino acids - *Public Domain*
