

Index

A

absolute entropy

[13.6: The Third Law of Thermodynamics](#)

acid strength

[15.3: Acid and Base Strength](#)

B

base strength

[15.3: Acid and Base Strength](#)

boiling point

[10.1: Bulk Properties of Liquids - Molecular Interpretation](#)

Born exponent

[21.5: Lattice Energies of Crystals](#)

Born–Landé equation

[21.5: Lattice Energies of Crystals](#)

C

calorimetry

[12.3: Heat Capacity, Enthalpy, and Calorimetry](#)

capillary action

[10.1: Bulk Properties of Liquids - Molecular Interpretation](#)

Carnot cycle

[13.8: Carnot Cycle, Efficiency, and Entropy](#)

E

Electrometallurgy

[17.6: Electrometallurgy](#)

enthalpy

[12.3: Heat Capacity, Enthalpy, and Calorimetry](#)

F

flickering clusters

[21.4: Defects and Amorphous Solids](#)

H

heat capacity

[12.3: Heat Capacity, Enthalpy, and Calorimetry](#)

Henry's law

[11.6: Phase Equilibrium in Solutions - Volatile Solutes](#)

hydrogen bond

[10.3: Intermolecular Forces in Liquids](#)

I

intermolecular forces

[10.2: Intermolecular Forces - Origins in Molecular Structure](#)

[10.3: Intermolecular Forces in Liquids](#)

ion pair

[10.2: Intermolecular Forces - Origins in Molecular Structure](#)

L

Lattice Energy

[21.5: Lattice Energies of Crystals](#)

Law of Mass Action

[14.2: The Empirical Law of Mass Action](#)

Le Châtelier's principle (changing concentrations)

[14.6: Reaction Directions \(Empirical Explanation\)](#)

Le Châtelier's principle (changing pressure)

[14.6: Reaction Directions \(Empirical Explanation\)](#)

Le Châtelier's principle (changing temperature)

[14.6: Reaction Directions \(Empirical Explanation\)](#)

Le Chatelier's principle

[14.6: Reaction Directions \(Empirical Explanation\)](#)

M

Madelung constant

[21.5: Lattice Energies of Crystals](#)

N

net ionic equation

[16.3: Precipitation and the Solubility Product](#)

nucleosynthesis

[19.6: Nuclear Fusion and Nucleosynthesis](#)

P

precipitation

[16.3: Precipitation and the Solubility Product](#)

Q

qualitative analysis

[16.6: A Deeper Look: Selective Precipitation of Ions](#)

R

reaction quotient

[14.6: Reaction Directions \(Empirical Explanation\)](#)

S

screw dislocation

[21.4: Defects and Amorphous Solids](#)

Solubility Constants

[16.2: Ionic Equilibria between Solids and Solutions](#)

solubility product

[16.3: Precipitation and the Solubility Product](#)

spontaneous change

[13.5: Entropy Changes and Spontaneity](#)

superfluid helium 4

[10.1: Bulk Properties of Liquids - Molecular Interpretation](#)

surface tension

[10.1: Bulk Properties of Liquids - Molecular Interpretation](#)

T

Third Law of Thermodynamics

[13.6: The Third Law of Thermodynamics](#)

V

viscosity

[10.1: Bulk Properties of Liquids - Molecular Interpretation](#)
