

## 8.1 Chapter Objectives and Preview

---

### Learning Objectives

After completing this chapter, you should be able to

- fulfill all of the detailed objectives listed under each individual section.
- solve road-map problems which may require the interpretation of spectral data.

This chapter is devoted to using your skills obtained in the previous sections to practice structure determination. There are five structure elucidation problems in this chapter using a variety of different spectral data to help solve the structures.
