

# Index

## A

### acid strength

[10.5: The Strengths of Acids and Bases](#)

### addition reaction

[12.5: Chemical Properties of Alkenes](#)

### alkanes

[11.3: Structures and Names of Alkanes](#)

### alkynes

[12.7: Alkynes](#)

### alpha form

[15.5: Cyclic Structures of Monosaccharides](#)

### amides

[14.15: Physical Properties of Amides](#)

### amines

[14.11: Amines - Structures and Names](#)

[14.13: Amines as Bases](#)

### Anilines

[14.11: Amines - Structures and Names](#)

### aromatic compounds

[12.8: Aromatic Compounds- Benzene](#)

[12.9: Structure and Nomenclature of Aromatic Compounds](#)

### Arrhenius acid

[10.2: Arrhenius Definition of Acids and Bases](#)

### Arrhenius base

[10.2: Arrhenius Definition of Acids and Bases](#)

### atomic mass

[2.5: Nuclei of Atoms](#)

### azidothymidine

[16.7: Viruses](#)

### AZT

[16.7: Viruses](#)

## B

### base strength

[10.5: The Strengths of Acids and Bases](#)

### Benedict's test

[15.6: Properties of Monosaccharides](#)

### benzene

[12.8: Aromatic Compounds- Benzene](#)

### bond energy

[7.5: Bond Energies and Chemical Reactions](#)

### Boyle's law

[8.5: Gas Laws](#)

## C

### carbohydrates

[15.2: Carbohydrates](#)

### charge balance

[3.3: Ions](#)

### Charles's law

[8.5: Gas Laws](#)

### chemistry equations

[5.3: Chemical Equations](#)

### coenzyme

[17.10: Enzyme Cofactors and Vitamins](#)

### cofactor

[17.10: Enzyme Cofactors and Vitamins](#)

### colligative properties

[9.5: Properties of Solutions](#)

### combination reaction

[5.5: Some Types of Chemical Reactions](#)

### combustion reaction

[5.5: Some Types of Chemical Reactions](#)

### common system

[3.5: Ionic Nomenclature](#)

### conversion factor

[1.8: Converting Units](#)

[6.4: Mole-Mass Conversions](#)

### covalent bond

[Chapter 4: Covalent Bonding and Simple Molecular Compounds](#)

[4.2: Covalent Bonds](#)

## D

### Dalton's law

[8.5: Gas Laws](#)

### decomposition reaction

[5.5: Some Types of Chemical Reactions](#)

### deletion mutation

[16.6: Mutations and Genetic Diseases](#)

### Denaturation

[17.5: Proteins](#)

### Diisopropyl fluorophosphate (DIFP)

[17.9: Enzyme Inhibition](#)

### disaccharides

[15.7: Disaccharides](#)

### dissociation

[9.4: The Dissolution Process](#)

### disulfides

[13.12: Organic Sulfur Compounds](#)

### duet rule

[3.2: Two Types of Bonding](#)

### dynamic equilibrium

[10.5: The Strengths of Acids and Bases](#)

## E

### enzyme activity

[17.8: Enzyme Activity](#)

### Enzyme Classification Number

[17.6: Enzymes](#)

### enzyme inhibition

[17.9: Enzyme Inhibition](#)

### enzymes

[17.6: Enzymes](#)

### esters

[14.7: Physical Properties of Esters](#)

[14.8: Preparation of Esters](#)

### ethers

[13.9: Ethers](#)

## F

### Fischer projection

[15.3: Classes of Monosaccharides](#)

## G

### genetic code

[16.5: Protein Synthesis and the Genetic Code](#)

### genetic diseases

[16.6: Mutations and Genetic Diseases](#)

## H

### hexose

[15.4: Important Hexoses](#)

### homology

[11.3: Structures and Names of Alkanes](#)

### hydration

[9.4: The Dissolution Process](#)

### hydrogenation

[12.5: Chemical Properties of Alkenes](#)

## I

### ideal gas law

[8.5: Gas Laws](#)

### insertion mutation

[16.6: Mutations and Genetic Diseases](#)

### insulin

[17.1: Prelude to Amino Acids, Proteins, and Enzymes](#)

### ionic bonding

[Chapter 3: Ionic Bonding and Simple Ionic Compounds](#)

### Ionic Nomenclature

[3.5: Ionic Nomenclature](#)

### isotopes

[2.5: Nuclei of Atoms](#)

## L

### law of conservation of mass

[5.2: The Law of Conservation of Matter](#)

### Le Chatelier's principle

[9.7: Le Chatelier's Principle](#)

## M

### measurements

[1.4: Measurements](#)

### molecules

[Chapter 4: Covalent Bonding and Simple Molecular Compounds](#)

### monatomic anions

[3.5: Ionic Nomenclature](#)

### monosaccharides

[15.5: Cyclic Structures of Monosaccharides](#)

### mutations

[16.6: Mutations and Genetic Diseases](#)

## N

### neutralization

[10.2: Arrhenius Definition of Acids and Bases](#)

### nucleic acids

[Chapter 16: Nucleic Acids](#)

### nucleotide

[16.2: Nucleotides](#)

### nylon

[14.16: Formation of Amides](#)

## O

### osmosis

[9.8: Osmosis and Diffusion](#)

### osmotic pressure

[9.5: Properties of Solutions](#)

## P

### peptides

[17.4: Peptides](#)

### phenols

[13.8: Phenols](#)

### phosphoesters

[14.10: Esters of Phosphoric Acid](#)

### Poisons

[17.9: Enzyme Inhibition](#)

polyamide

[14.16: Formation of Amides](#)

polymers

[12.6: Polymers](#)

primary structure

[17.5: Proteins](#)

proteins

[17.5: Proteins](#)

purine

[16.2: Nucleotides](#)

pyrimidine

[16.2: Nucleotides](#)

## Q

quaternary structure

[17.5: Proteins](#)

## R

redox reaction

[5.6: Oxidation-Reduction \(Redox\) Reactions](#)

Redox Reactions (Organic Chemistry)

[5.7: Redox Reactions in Organic Chemistry and Biochemistry](#)

Renaturation

[17.5: Proteins](#)

Reversible Inhibition

[17.9: Enzyme Inhibition](#)

Ringer's lactate

[9.1: Prelude to Solutions](#)

## S

s block

[1.7: The International System of Units](#)

saturated

[11.3: Structures and Names of Alkanes](#)

scientific notation

[1.5: Expressing Numbers - Scientific Notation](#)

secondary structure

[17.5: Proteins](#)

SI units

[1.7: The International System of Units](#)

Significant Figure

[1.6: Expressing Numbers - Significant Figures](#)

significant figures

[1.8: Converting Units](#)

solubility

[9.3: Concentration](#)

solvation

[9.4: The Dissolution Process](#)

Stock system

[3.5: Ionic Nomenclature](#)

stoichiometric factor

[6.5: Mole-Mole Relationships in Chemical Reactions](#)

stoichiometry

[5.4: Quantitative Relationships Based on Chemical Equations](#)

[6.5: Mole-Mole Relationships in Chemical Reactions](#)

strong electrolytes

[9.4: The Dissolution Process](#)

substitution mutation

[16.6: Mutations and Genetic Diseases](#)

sucrose

[15.7: Disaccharides](#)

## T

taxol

[6.6: Mole-Mass and Mass-Mass Problems](#)

tertiary structure

[17.5: Proteins](#)

tripeptide

[17.4: Peptides](#)

## U

units

[1.4: Measurements](#)

## V

vapor pressure depression

[9.5: Properties of Solutions](#)

virus

[16.7: Viruses](#)

vitamin

[17.10: Enzyme Cofactors and Vitamins](#)

VSEPR

[4.6: Characteristics of Molecules](#)

## W

weak electrolytes

[9.4: The Dissolution Process](#)
