

Index

A

A values

- 3.4: Naming Alkanes
- 4.8: Conformations of Disubstituted Cyclohexanes

abbreviated structures

- 4.9: Conformations of Polycyclic Molecules

acetylide anion

- 9.7: Alkyne Acidity - Formation of Acetylide Anions

acid dissociation constant

- 2.7: Acid and Base Strength

acid strength

- 2.7: Acid and Base Strength

Acidity Constant

- 2.7: Acid and Base Strength

acidity order

- 9.7: Alkyne Acidity - Formation of Acetylide Anions

activation energy

- 6.9: Describing a Reaction - Energy Diagrams and Transition States

addition reaction

- 6.1: Kinds of Organic Reactions

alkanes

- 3.4: Naming Alkanes

alkene reaction map

- 9.9: An Introduction to Organic Synthesis

alkyl group

- 3.3: Alkyl Groups

Alkyl Shift

- 7.12: Evidence for the Mechanism of Electrophilic Additions - Carbocation Rearrangements

alkylation

- 9.8: Alkylation of Acetylide Anions

alkyne

- 9.3: Reactions of Alkynes - Addition of HX and X₂
- 9.6: Oxidative Cleavage of Alkynes

alkynes

- 9.1: Naming Alkynes

allyl radical

- 10.4: Stability of the Allyl Radical - Resonance Revisited

Allylic Bromination

- 10.3: Preparing Alkyl Halides from Alkenes - Allylic Bromination

allylic carbon

- 10.3: Preparing Alkyl Halides from Alkenes - Allylic Bromination

angle strain

- 4.3: Stability of Cycloalkanes - Ring Strain

anion radical

- 9.5: Reduction of Alkynes

anti conformation

- 3.7: Conformations of Other Alkanes

atomic number

- 1.1: Atomic Structure - The Nucleus

atomic weight

- 1.1: Atomic Structure - The Nucleus

aufbau principle

- 1.3: Atomic Structure - Electron Configurations

Author Bars

- 7.4: Naming Alkenes

axial position

- 4.6: Axial and Equatorial Bonds in Cyclohexane

B

Baeyer theory

- 4.3: Stability of Cycloalkanes - Ring Strain

base strength

- 2.7: Acid and Base Strength

benzylic

- 11.5: Characteristics of the S_N1 Reaction

bimolecular reaction

- 11.2: The S_N2 Reaction

biological elimination reactions

- 11.11: Biological Elimination Reactions

bonding molecular orbital

- 1.11: Describing Chemical Bonds - Molecular Orbital Theory

bridgehead carbon atom

- 4.9: Conformations of Polycyclic Molecules

C

carbocation

- 6.5: An Example of a Polar Reaction - Addition of HBr to Ethylene

Carbocation Rearrangements

- 7.12: Evidence for the Mechanism of Electrophilic Additions - Carbocation Rearrangements

carbocations

- 2.2: Formal Charges

chain reaction

- 6.3: Radical Reactions

chair conformation

- 4.5: Conformations of Cyclohexane

chiral resolution

- 5.3: Optical Activity

chirality

- 5.1: Enantiomers and the Tetrahedral Carbon
- 5.2: The Reason for Handedness in Molecules - Chirality

coenzyme

- 6.11: A Comparison between Biological Reactions and Laboratory Reactions

cofactor

- 6.11: A Comparison between Biological Reactions and Laboratory Reactions

conformation

- 3.6: Conformations of Ethane

conformational analysis

- 4.8: Conformations of Disubstituted Cyclohexanes

conformational isomers

- 5.9: A Review of Isomerism

conjugate acid

- 2.6: Acids and Bases - The Brønsted-Lowry Definition

conjugate bases

- 2.6: Acids and Bases - The Brønsted-Lowry Definition

constitutional isomer

- 4.2: Cis-Trans Isomerism in Cycloalkanes

cycloalkanes

- 4.1: Naming Cycloalkanes

cyclohexane

- 4.5: Conformations of Cyclohexane

cyclohexanes

- 4.7: Conformations of Monosubstituted Cyclohexanes

D

dehydration

- 8.1: Preparation of Alkenes - A Preview of Elimination Reactions

dehydrohalogenation

- 8.1: Preparation of Alkenes - A Preview of Elimination Reactions

delocalization

- 2.3: Resonance

delocalized electrons

- 10.4: Stability of the Allyl Radical - Resonance Revisited

Deuterium Isotope Effect

- 11.8: The E2 Reaction and the Deuterium Isotope Effect

dextrorotatory

- 5.3: Optical Activity
- 5.4: Pasteur's Discovery of Enantiomers

diastereomers

- 5.6: Diastereomers

dielectric constant

- 11.5: Characteristics of the S_N1 Reaction

dihedral angle

- 3.6: Conformations of Ethane

dipole moment

- 2.1: Polar Covalent Bonds - Dipole Moments

dissolving metal reduction

- 9.5: Reduction of Alkynes

Disubstituted Cyclohexanes

- 4.8: Conformations of Disubstituted Cyclohexanes

E

E,Z Notation

- 7.6: Sequence Rules - The E,Z Designation

E1 reaction

- 11.10: The E1 and E1cB Reactions

E1cB

- 11.10: The E1 and E1cB Reactions

E1cB reaction

- 11.10: The E1 and E1cB Reactions

E2

- 11.8: The E2 Reaction and the Deuterium Isotope Effect

E2 reaction

- 11.8: The E2 Reaction and the Deuterium Isotope Effect

eclipsed conformation

- 3.6: Conformations of Ethane
- 3.7: Conformations of Other Alkanes

eclipsing strain

- 3.6: Conformations of Ethane

electron

- 1.1: Atomic Structure - The Nucleus

electrophile

- 2.10: Acids and Bases - The Lewis Definition
- 6.4: Polar Reactions

electrophilic addition

- 6.5: An Example of a Polar Reaction - Addition of HBr to Ethylene

electrophilic

- 6.6: Using Curved Arrows in Polar Reaction Mechanisms

elimination reaction

- 6.1: Kinds of Organic Reactions
- 8.1: Preparation of Alkenes - A Preview of Elimination Reactions

enantiomer

5.1: Enantiomers and the Tetrahedral Carbon

enantiomeric excess

5.3: Optical Activity

enantiomers

5.4: Pasteur's Discovery of Enantiomers

enantiotopic

5.11: Prochirality

enol

9.4: Hydration of Alkynes

epimers

5.9: A Review of Isomerism

equatorial position

4.6: Axial and Equatorial Bonds in Cyclohexane

equilibrium constant

2.7: Acid and Base Strength

ethane

1.7: sp^3 Hybrid Orbitals and the Structure of Ethane

ethylene

1.7: sp^3 Hybrid Orbitals and the Structure of Ethane

F

formal charge

2.2: Formal Charges

freon

10.0: Introduction to Organohalides

functional group

3.1: Functional Groups

G

gasoline

3.8: Gasoline - A Deeper Look

gauche conformation

3.7: Conformations of Other Alkanes

Gilman Reagents

10.7: Organometallic Coupling Reactions

Grignard reagents

10.6: Reactions of Alkyl Halides - Grignard Reagents

H

Hammond Postulate

7.11: The Hammond Postulate

heat of combustion

4.3: Stability of Cycloalkanes - Ring Strain

heteroatom

10.8: Oxidation and Reduction in Organic Chemistry

heterogenic

6.2: How Organic Reactions Occur - Mechanisms

heterolytic

6.2: How Organic Reactions Occur - Mechanisms

homogenic

6.2: How Organic Reactions Occur - Mechanisms

homolytic

6.2: How Organic Reactions Occur - Mechanisms

Hund's rule

1.3: Atomic Structure - Electron Configurations

hybrid orbitals

1.6: sp^3 Hybrid Orbitals and the Structure of Methane

Hydride shift

7.12: Evidence for the Mechanism of Electrophilic Additions - Carbocation Rearrangements

I

initiation step

6.3: Radical Reactions

isobutyl group

3.3: Alkyl Groups

isomerism

5.9: A Review of Isomerism

isopropyl group

3.3: Alkyl Groups

K

Kekulé structure

1.12: Drawing Chemical Structures

kinetics

11.2: The SN_2 Reaction

L

leaving group

11.3: Characteristics of the SN_2 Reaction

levorotatory

5.3: Optical Activity

Lindlar catalyst

9.5: Reduction of Alkynes

London dispersion forces

3.5: Properties of Alkanes

M

Markovnikov's rule

7.9: Orientation of Electrophilic Additions - Markovnikov's Rule

Markovnikov's Rule

7.9: Orientation of Electrophilic Additions - Markovnikov's Rule

Mass Number

1.1: Atomic Structure - The Nucleus

mechanism

6.2: How Organic Reactions Occur - Mechanisms

Meso Compounds

5.7: Meso Compounds

methyl group

3.3: Alkyl Groups

molecular orbital theory

1.11: Describing Chemical Bonds - Molecular Orbital Theory

N

neutron

1.1: Atomic Structure - The Nucleus

Newman projection

3.6: Conformations of Ethane

nucleophile

2.10: Acids and Bases - The Lewis Definition
6.4: Polar Reactions

nucleophilic

6.6: Using Curved Arrows in Polar Reaction Mechanisms

O

octane scale

3.8: Gasoline - A Deeper Look

optical activity

5.3: Optical Activity

organohalides

10: Organohalides

oxidation

10.8: Oxidation and Reduction in Organic Chemistry

oxidative cleavage of alkynes

9.6: Oxidative Cleavage of Alkynes

oxymercuration

8.4: Hydration of Alkenes - Addition of H_2O by Oxymercuration

P

Pauli exclusion principle

1.3: Atomic Structure - Electron Configurations

periplanar

11.8: The E_2 Reaction and the Deuterium Isotope Effect

petroleum

3.8: Gasoline - A Deeper Look

pheromone

10.7: Organometallic Coupling Reactions

phosphorus pentachloride

11.1: The Discovery of Nucleophilic Substitution Reactions

pKa

2.8: Predicting Acid-Base Reactions from pK_a Values

polar aprotic solvent

11.3: Characteristics of the SN_2 Reaction

polar covalent bonds

2.1: Polar Covalent Bonds - Dipole Moments

polar reaction

6.2: How Organic Reactions Occur - Mechanisms
6.4: Polar Reactions

polarizability

6.4: Polar Reactions

polarizer

5.3: Optical Activity

polycyclic compounds

4.1: Naming Cycloalkanes

polycyclic molecules

4.9: Conformations of Polycyclic Molecules

primary carbon

3.3: Alkyl Groups

prochiral

5.11: Prochirality

Prochirality

5.11: Prochirality

propagation step

6.3: Radical Reactions

proton

1.1: Atomic Structure - The Nucleus

Q

quaternary carbon

3.3: Alkyl Groups

R

racemic mixture

5.4: Pasteur's Discovery of Enantiomers
5.8: Racemic Mixtures and the Resolution of Enantiomers

racemic modification

5.4: Pasteur's Discovery of Enantiomers

racemization

5.3: Optical Activity

radical reaction

6.2: How Organic Reactions Occur - Mechanisms

radical substitution

6.3: Radical Reactions

rate coefficient

11.2: The SN_2 Reaction

rate equation
