

Index

A

absolute configuration
25.4: Configurations of Aldoses

aldose
25.1: Classification of Carbohydrates

alternating copolymers
30.3: Copolymers

amide
24.3: Basicity of Amines

amide synthesis reaction
26.5: Peptides and Proteins

amidomalonate synthesis
26.4: Synthesis of Amino Acids

amino acid analyzer
26.6: Amino Acid Analysis of Peptides

amino sugar
25.10: Other Important Carbohydrates

amphoteric
26.2: Structures of Amino Acids

amylopectin
25.9: Polysaccharides and Their Synthesis

amylose
25.9: Polysaccharides and Their Synthesis

aniline
24.4: Basicity of Arylamines
24.8: Reactions of Arylamines

anomers
25.5: Cyclic Structures of Monosaccharides - Anomers

antarafacial cycloaddition
29.5: Cycloaddition Reactions

anticodon
28.5: Translation of RNA - Protein Biosynthesis

arenediazonium salt
24.8: Reactions of Arylamines

arylamines
24.4: Basicity of Arylamines
24.8: Reactions of Arylamines

atactic
30.2: Stereochemistry of Polymerization - Ziegler-Natta Catalysts

Author Bars
26.6: Amino Acid Analysis of Peptides

azide synthesis
24.6: Synthesis of Amines

azo compound
24.8: Reactions of Arylamines

B

Bakelites
30.6: Polymer Structure and Physical Properties

block copolymers
30.3: Copolymers

buffer
24.5: Biological Amines and the Henderson-Hasselbalch Equation

C

carbohydrate
25.0: Introduction

Carbohydrates
25.1: Classification of Carbohydrates

citrate synthase
26.12: How do Enzymes Work? Citrate Synthase

Claisen rearrangement

29.8: Some Examples of Sigmatropic Rearrangements

codon
28.5: Translation of RNA - Protein Biosynthesis

coenzyme
26.11: Enzymes and Coenzymes

cofactor
26.11: Enzymes and Coenzymes

Cope rearrangement
29.8: Some Examples of Sigmatropic Rearrangements

Copolymers
30.3: Copolymers

Cortisone
27.6: Steroids

Curtius rearrangement
24.6: Synthesis of Amines

cycloaddition
29.6: Stereochemistry of Cycloadditions

D

D sugar
25.3: D, L Sugars

deoxy sugar
25.10: Other Important Carbohydrates

deoxyribonucleic acid
28.1: Nucleotides and Nucleic Acids

dienophile
29.5: Cycloaddition Reactions

Disaccharide
25.1: Classification of Carbohydrates
25.8: Disaccharides

DNA
28.1: Nucleotides and Nucleic Acids

DNA sequencing
28.6: DNA Sequencing

DNA Sequencing
28.6: DNA Sequencing

DNA synthesis
28.7: DNA Synthesis

E

Edman degradation
26.7: The Edman Degradation

eicosanoids
27.4: Prostaglandins and Other Eicosanoids

elastomers
30.6: Polymer Structure and Physical Properties

electrocyclic reactions
29.2: Electrocyclic Reactions

electrophoresis
26.3: Amino Acids, the Henderson-Hasselbalch Equation, and Isoelectric Points

enantioselective synthesis
26.4: Synthesis of Amino Acids

enzyme
26.11: Enzymes and Coenzymes

F

fats
27.1: Waxes, Fats, and Oils

Fischer projection
25.2: Depicting Carbohydrate Stereochemistry - Fischer Projections

frontier molecular orbital theory

29.1: Molecular Orbitals of Conjugated Pi Systems

G

Gabriel synthesis
24.6: Synthesis of Amines

glycoproteins
25.11: Cell-Surface Carbohydrates and Influenza Viruses

graft copolymers
30.3: Copolymers

H

hemiacetal
25.5: Cyclic Structures of Monosaccharides - Anomers

Hofmann Elimination
24.7: Reactions of Amines

Hofmann rearrangement
24.6: Synthesis of Amines

HOMO
29.1: Molecular Orbitals of Conjugated Pi Systems

HOMO–LUMO gap
29.1: Molecular Orbitals of Conjugated Pi Systems

Hormones
27.6: Steroids

I

imide
24.6: Synthesis of Amines

invert sugar
25.8: Disaccharides

isoelectric point
26.3: Amino Acids, the Henderson-Hasselbalch Equation, and Isoelectric Points

isoprene rule
27.5: Terpenoids

isotactic polymer
30.2: Stereochemistry of Polymerization - Ziegler-Natta Catalysts

K

ketose
25.1: Classification of Carbohydrates

L

LUMO
29.1: Molecular Orbitals of Conjugated Pi Systems

M

Merrifield synthesis
26.9: The Merrifield Solid-Phase Technique

messenger RNA
28.4: Transcription of DNA

Monosaccharide
25.1: Classification of Carbohydrates

monosaccharides
25.6: Reactions of Monosaccharides

morphology
30.6: Polymer Structure and Physical Properties

N

Ninhydrin reaction

26.6: Amino Acid Analysis of Peptides

nitrogen rule

24.10: Spectroscopy of Amines

nucleosides

28.1: Nucleotides and Nucleic Acids

nucleotides

28.1: Nucleotides and Nucleic Acids

O

oils

27.1: Waxes, Fats, and Oils

Okazaki fragments

28.3: Replication of DNA

olefin metathesis

30.5: Olefin Metathesis Polymerization

olefin metathesis polymerization

30.5: Olefin Metathesis Polymerization

oligosaccharide

25.11: Cell-Surface Carbohydrates and Influenza Viruses

P

PCR

28.8: The Polymerase Chain Reaction

peptide synthesis

26.8: Peptide Synthesis

pericyclic reactions

29.9: A Summary of Rules for Pericyclic Reactions

phenyl isothiocyanate

26.7: The Edman Degradation

phosphate esters

27.3: Phospholipids

phosphoglyceride

27.3: Phospholipids

Phospholipids

27.3: Phospholipids

polyamides

30.4: Step-Growth Polymers

polyesters

30.4: Step-Growth Polymers

polymer crystallinity

30.6: Polymer Structure and Physical Properties

polymerase chain reaction

28.8: The Polymerase Chain Reaction

polysaccharide

25.1: Classification of Carbohydrates

25.9: Polysaccharides and Their Synthesis

prostaglandins

27.4: Prostaglandins and Other Eicosanoids

protein structure

26.10: Protein Structure

pyramidal inversion

24.2: Structure and Properties of Amines

Pyrrole

24.9: Heterocyclic Amines

R

racemic mixture

26.4: Synthesis of Amino Acids

random copolymers

30.3: Copolymers

reductive amination

24.6: Synthesis of Amines

replication

28.3: Replication of DNA

restriction endonucleases

28.6: DNA Sequencing

Restriction Enzymes

28.6: DNA Sequencing

ribonucleic acid

28.1: Nucleotides and Nucleic Acids

ribosomal RNA

28.4: Transcription of DNA

RNA

28.1: Nucleotides and Nucleic Acids

RNA Polymerase

28.4: Transcription of DNA

RNA translation

28.5: Translation of RNA - Protein Biosynthesis

S

Sandmeyer reaction

24.8: Reactions of Arylamines

Schiemann reaction

24.8: Reactions of Arylamines

Schrock's catalyst

30.5: Olefin Metathesis Polymerization

semiconservative replication

28.3: Replication of DNA

sigmatropic reactions

29.7: Sigmatropic Rearrangements

sigmatropic rearrangements

29.7: Sigmatropic Rearrangements

29.8: Some Examples of Sigmatropic Rearrangements

soap

27.2: Soap

statistical copolymers

30.3: Copolymers

Steroids

27.6: Steroids

27.7: Biosynthesis of Steroids

substrate

26.11: Enzymes and Coenzymes

sulfa drug

24.8: Reactions of Arylamines

suprafacial cycloaddition

29.5: Cycloaddition Reactions

surfactant

27.2: Soap

syndiotactic

30.2: Stereochemistry of Polymerization - Ziegler-Natta Catalysts

T

tacticity

30.2: Stereochemistry of Polymerization - Ziegler-Natta Catalysts

terpenes

27.5: Terpenoids

terpenoids

27.5: Terpenoids

Theory of Conservation of Orbital Symmetry

29.1: Molecular Orbitals of Conjugated Pi Systems

thermal electrocyclic reactions

29.3: Stereochemistry of Thermal Electrocyclic Reactions

transcription

28.4: Transcription of DNA

transfer RNA

28.4: Transcription of DNA

translation

28.5: Translation of RNA - Protein Biosynthesis

V

vitamin

26.11: Enzymes and Coenzymes

W

Waxes

27.1: Waxes, Fats, and Oils
