

CHAPTER OVERVIEW

4: Module 4

We have already established that quantities are important in science, especially in chemistry. It is important to make accurate measurements of a variety of quantities when performing experiments. However, it is also important to be able to relate one measured quantity to another, unmeasured quantity. In this chapter, we will consider how we manipulate quantities to relate them to each other.

- [4.1: Stoichiometry](#)
- [4.2: The Mole](#)
- [4.3: The Mole in Chemical Reactions](#)
- [4.4: Mole-Mass and Mass-Mass Calculations](#)
- [4.5: Yields](#)
- [4.6: Limiting Reagents](#)
- [4.7: Energy](#)
- [4.8: Work and Heat](#)
- [4.9: Enthalpy and Chemical Reactions](#)
- [4.10: Intermolecular Forces](#)
- [4.11: Phase Transitions - Melting, Boiling, and Subliming](#)
- [4.12: Prelude to Solutions](#)
- [4.13: Definitions](#)
- [4.14: Quantitative Units of Concentration](#)
- [4.15: Dilutions and Concentrations](#)
- [4.16: Concentrations as Conversion Factors](#)
