

Index

A

activity coefficient

2.7: Activities of Nonideal Solutions

adiabatic process

1.5: The Second Law of Thermodynamics

B

biochemical reactions

1.4: Thermochemistry

Boltzmann

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

Boltzmann distribution

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

C

chemical reactions

1.4: Thermochemistry

Clapeyron Equation

1.10.4: The Chemical Potentials of a Pure Substance in Two Phases in Equilibrium

critical opalescence

1.10.2: A Phase Diagram Summarizes the Solid-Liquid-Gas Behavior of a Substance

D

degeneracy

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

degenerate energy levels

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

E

endothermic reaction

1.4: Thermochemistry

energy configuration

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

energy conservation

1.5: The Second Law of Thermodynamics

energy levels

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

energy states

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

enthalpy

1.4: Thermochemistry

enthalpy change

1.4: Thermochemistry

entropy

1.5: The Second Law of Thermodynamics
1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

entropy change

1.5: The Second Law of Thermodynamics

entropy of universe

1.5: The Second Law of Thermodynamics

equilibrium

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

exothermic reaction

1.4: Thermochemistry

F

first law

1.5: The Second Law of Thermodynamics

fugacity

1.8.8: Fugacity Measures Nonideality of a Gas

G

Gibbs energy

1.8.2: Gibbs Energy Determines the Direction of Spontaneity at Constant Pressure and Temperature

H

heat capacity

1.4: Thermochemistry

heat of formation

1.4: Thermochemistry

heat transfer

1.4: Thermochemistry

1.5: The Second Law of Thermodynamics

Helmholtz function

1.8.1: Helmholtz Energy

hess's law

1.4: Thermochemistry

I

ideal gas

1.5: The Second Law of Thermodynamics

ideal mixing

1.5: The Second Law of Thermodynamics

ionic strength

3.4: The Debye-Hückel Theory

irreversible process

1.5: The Second Law of Thermodynamics

K

Kirchhoff's law

1.4: Thermochemistry

L

Lagrange multipliers

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

M

macrostates

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

Margules Functions

2.6: Vapor Pressures of Volatile Binary Solutions

Maxwell Relations

1.8.3: The Maxwell Relations

microstates

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

molar enthalpy

1.4: Thermochemistry

molar heat capacity

1.5: The Second Law of Thermodynamics

N

natural variable

1.8.1: Helmholtz Energy

O

osmotic coefficient

3.2: The Activities of Nonvolatile Solutes

P

particles

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

partition function

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

phase change

1.5: The Second Law of Thermodynamics

physics

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

practice problems

1.5: The Second Law of Thermodynamics

probability distribution

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

R

reaction enthalpy

1.4: Thermochemistry

reversible heat

1.5: The Second Law of Thermodynamics

reversible process

1.5: The Second Law of Thermodynamics

Rudolf Clausius

1.5: The Second Law of Thermodynamics

S

second law

1.5: The Second Law of Thermodynamics

spontaneous process

1.5: The Second Law of Thermodynamics

standard state

1.4: Thermochemistry

state function

1.4: Thermochemistry

statistical mechanics

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

statistical thermodynamics

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

T

tabulated data

1.4: Thermochemistry

temperature dependence

1.4: Thermochemistry

thermodynamic observables

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy

Thermodynamic Stability

1.10.2: A Phase Diagram Summarizes the Solid-Liquid-Gas Behavior of a Substance

thermodynamics

1.4: Thermochemistry

1.5: The Second Law of Thermodynamics

1.6: The Boltzmann Distribution and the Statistical Definition of Entropy
