CHAPTER OVERVIEW

10: Approximate Quantum Mechanical Methods

10.1: Trial Wavefunctions for Various Potentials
10.2: Energy Minimization - Four Methods Using Mathcad
10.3: The Variation Theorem in Dirac Notation
10.4: A Rudimentary Model for Alpha Particle Decay
10.5: Variational Method for a Particle in a Finite Potential Well
10.6: Variation Method for a Particle in a Symmetric 1D Potential Well
10.7: Variation Method for the Rydberg Potential
10.8: Variation Method for the Quartic Oscillator
10.9: Momentum-Space Variation Method for the Quartic Oscillator
10.10: Variation Method for a Particle in a Gravitational Field
10.11: Linear Variational Method for a Particle in a Slanted 1D Box
10.12: Variation Method for a Particle in a Semi-Infinite Potential Well
10.13: Variation Method for a Particle in a Box with an Internal Barrier
10.14: Variation Method for a Particle in a 1D Ice Cream Cone
10.15: Variation Method for a Particle in an Ice Cream Cone
10.16: Variation Method for a Particle in a Finite 3D Spherical Potential Well
10.17: Variation Method for the Harmonic Oscillator
10.18: Trigonometric Trial Wave Function for the Harmonic Potential Well
10.19: Trigonometric Trial Wave Function for the 3D Harmonic Potential Well
10.20: Gaussian Trial Wavefunction for the Hydrogen Atom
10.21: Variation Calculation on the 1D Hydrogen Atom Using a Trigonometric Trial Wave Function
10.22: Variation Calculation on the 1D Hydrogen Atom Using a Gaussian Trial Wavefunction
10.23: Variational Calculation on the Two-dimensional Hydrogen Atom
10.24: Variational Calculation on Helium Using a Hydrogenic Wavefunction
10.25: Gaussian Trial Wave Function for the Helium Atom
10.26: Trigonometric Trial Wavefunction for the Helium Atom
10.27: Trigonometric Trial Wavefunction for the Hydrogen Atom
10.28: Hydrogen Atom Calculation Assuming the Electron is a Particle in a Sphere of Radius R
10.29: Electronic Structure - Variational Calculations on the Lithium Atom
10.30: The Variation Method in Momentum Space
10.31: Momentum-Space Variation Method for Particle in a Gravitational Field
10.32: Momentum-Space Variation Method for the Abs(x) Potential
10.33: Variational Method for the Feshbach Potential
10.34: Numerical Solution for the Feshbach Potential
10.35: First Order Degenerate Perturbation Theory - the Stark Effect of the Hydrogen Atom
10.36: Variational Calculation for the Polarizability of the Hydrogen Atom
10.37: Hybrid Variational Calculation for the 1D Hydrogen Atom with Delta Function Potential
10.38: Variation Method Using the Wigner Function- Finite Potential Well
10.39: 455. Variation Method Using the Wigner Function- V(x) = |x|
10.40: Variation Method Using the Wigner Function- The Harmonic Oscillator
10.41: Variation Method Using the Wigner Function - The Quartic Oscillator
10.42: Variation Method Using the Wigner Function - The Feshbach Potential
