

Index

A

Airy pattern

1.14: Quantum Mechanics and the Fourier Transform

alpha decay

10.4: A Rudimentary Model for Alpha Particle Decay

atomic properties

11.3: Commentary on "Probing the Orbital Energy of an Electron in an Atom"

Atomic volume

2.46: Calculating the Atomic Radius of Polonium

B

Bell states

1.7: Quantum Computation- A Short Course
8.53: Bell State Exercises

Bell Theorem

8.45: Yet Another Assault on Local Realism - A Matrix/Tensor Algebra Approach

8.46: Jim Baggott's Bell Theorem Analysis

8.48: Another Bell Theorem Analysis - Shorter Version

Bell's theorem

1.5: Quantum Computation - A Short Course

C

Circularly polarized light

7.14: Matrix Mechanics Approach to Polarized Light
7.15: Matrix Mechanics Approach to Polarized Light - Version 2

7.24: Optical Activity - A Quantum Perspective

confinement energy

1.3: Atomic and Molecular Stability

cosmic microwave background radiation

11.19: Age of the Elements

Cosmic Radiation

11.18: Cosmic Background Radiation

cyanine dyes

4.3: Cyanine Dyes as Two-State Electronic Systems

D

Degenerate Perturbation Theory

10.35: First Order Degenerate Perturbation Theory - the Stark Effect of the Hydrogen Atom

density operator

7.9: Pure States, Mixtures and the Density Operator

Deutsch-Jozsa Algorithm

1.8: Quantum Computation- A Short Course

Deutsch's Problem

8.68: A Simple Solution to Deutsch's Problem

diffraction pattern

1.14: Quantum Mechanics and the Fourier Transform
5.9: Calculating Diffraction Patterns

Dirac delta function

1.25: The Dirac Delta Function

Dirac equation

1.36: Aspects of Dirac's Relativistic Matrix Mechanics

Dirac Notation

1.26: Elements of Dirac Notation

dodecahedrane

6.2: Dodecahedrane

down converter

7.39: Analysis of a Two-photon Quantum Eraser

downconversion

7.26: Two Photon Interference - The Creation of an Entangled Superposition

E

effective potential energy

1.3: Atomic and Molecular Stability

Electrons within a Ring

1.86: Quantum Corrals - Electrons within a Ring

Entangled Bipartate Superposition

8.64: Examining the Local States of an Entangled Bipartate Superposition

entanglement

1.7: Quantum Computation- A Short Course
8.59: An Entanglement Swapping Protocol

expectation value

7.10: Using the Trace Function to Calculate Expectation Values

F

Feshbach Potential

10.33: Variational Method for the Feshbach Potential
10.42: Variation Method Using the Wigner Function - The Feshbach Potential

G

GHZ Entanglement

8.16: GHZ Entanglement - A Tensor Algebra Analysis

Grover Search Algorithm

1.10: Quantum Computation- A Short Course

H

Hadamard gate

8.53: Bell State Exercises

Hardy's Paradox

8.52: Hardy's Paradox

L

ladder operators

1.28: Raising and Lowering; Creating and Annihilating

7.4: Single Photon Interference - Fourth Version

linearly polarized light

7.24: Optical Activity - A Quantum Perspective

locality

8.14: Greenberger-Horne-Zeilinger (GHZ) Entanglement and Local Realism

M

Mach-Zehnder interferometer

7.22: A Quantum Circuit for a Michelson Interferometer

maser

4.4: The Ammonia Inversion and the Maser

Matrix Mechanics

1.33: Basic Matrix Mechanics

1.35: Matrix Mechanics

7.16: Matrix Mechanics Exercises Using Polarized Light

methane

6.8: CH₄

Michelson Interferometer

7.21: Two Analyses of the Michelson Interferometer
mixed states

7.9: Pure States, Mixtures and the Density Operator

Morse potential

4.8: Visualizing the Formally Forbidden Overtone Vibrational Transitions in HCl

9.12: Numerical Solutions for Morse Oscillator

N

Neutron Interferometry

7.18: Neutron Interferometry with Polarized Spin States

Numerical Solutions

9: Numerical Solutions for Schrödinger's Equation

O

optical activity

7.24: Optical Activity - A Quantum Perspective

overlap integral

1.26: Elements of Dirac Notation

overtones

4.8: Visualizing the Formally Forbidden Overtone Vibrational Transitions in HCl

P

parametric down converter

1.7: Quantum Computation- A Short Course
7.27: Two-particle Interference for Bosons and Fermions

path integrals

1.9: Quantum Computation- A Short Course

Planck Distribution

11.18: Cosmic Background Radiation

polarizability

10.36: Variational Calculation for the Polarizability of the Hydrogen Atom

Polarizing Beam Splitter

7.6: The Polarizing Beam Splitter and the Superposition Principle

Polonium

2.46: Calculating the Atomic Radius of Polonium

Positronium

1.4: Atomic and Molecular Stability

2.4: A de Broglie-Bohr Model for Positronium

Positronium Annihilation

8.34: Positronium Annihilation

pure state

7.9: Pure States, Mixtures and the Density Operator

Q

Quantum Beats

4.11: Quantum Beats

Quantum centrifugal potential

1.3: Atomic and Molecular Stability

quantum chemistry

11.3: Commentary on "Probing the Orbital Energy of an Electron in an Atom"

quantum cloning

1.6: Quantum Computation- A Short Course

Quantum Computation

- [1.5: Quantum Computation - A Short Course](#)
- [1.6: Quantum Computation- A Short Course](#)
- [1.7: Quantum Computation- A Short Course](#)
- [1.8: Quantum Computation- A Short Course](#)

quantum error correction

- [1.10: Quantum Computation- A Short Course](#)

quantum pressure

- [1.98: Quantum Mechanical Pressure](#)

Quantum Teleportation

- [1.6: Quantum Computation- A Short Course](#)
- [8: Quantum Teleportation](#)
