

## 4: Biological and Synthetic Dioxygen Carriers

---

### I. Introduction

#### A. Requirements for Effective Oxygen Carriers

1. Thermodynamic Factors<sup>19-20</sup>
2. Kinetic Factors
3. Dioxygen Reactions

#### B. Biological Oxygen Carriers

1. The Hemoglobin Family
2. The Hemocyanin Family
3. The Hemerythrin Family

#### C. Hazards of Life with Dioxygen

### II. Selected Chemistry of Dioxygen, Iron, Copper, and Cobalt

#### A. General Aspects of the Chemistry of Dioxygen

1. Redox Chemistry of Free Molecular Dioxygen
2. Geometry and Electronic Structure of Coordinated Dioxygen

#### B. General Aspects of the Chemistry of Iron

1. Irreversible Oxidation
2. Spectroscopy of the  $\text{Fe}^{\text{III}}\text{—O—Fe}^{\text{III}}$  Moiety
3. Oxidation and Spin States of Iron Porphyrins

#### C. General Aspects of the Chemistry of Copper

#### D. General Aspects of the Chemistry of Cobalt

#### E. Other Ligands for Biological Oxygen Carriers

1. Carbon Monoxide
2. Nitric Oxide
3. Isocyanide and Nitroso Species

#### F. Nature of the Metal-Dioxygen Linkage in Biological Systems

1. Oxyhemocyanin and Oxyhemerythrin
2. Oxyhemoglobin
3. A Simple Model for the Electronic Structure of Liganded Hemoglobins

#### G. Role of the Protein in Effecting Biological Oxygen Transport

1. Provision of Ligands to the Metal
2. Protection of the Metal-dioxygen Moiety
3. Modulation of Ligand-binding Properties

#### H. Requirements for a Model System for Hemoglobin

### III. Structural Basis of Ligand Affinities of Oxygen Carriers

#### A. Ligand Affinities in Hemoglobins and Their Models

#### B. General Structural Features that Modulate Ligand Affinity

1. Proximal Effects
2. Distal Effects
3. Approximate Contribution of Proximal and Distal Effects to Ligand Affinity

#### C.

### Detailed Structures of Hemoglobins and Model Systems

1. [Structures Relevant to Deoxy Hemoglobins](#)
2. [Structures Relevant to Liganded Hemoglobins](#)

### D. Stereochemical Changes Upon Ligation

1. [Structural Changes in Normal-affinity Systems](#)
2. [Structural Changes in Low-affinity Systems](#)
3. [Structural Changes in High-affinity Systems](#)

## [IV. Dioxygen Carriers and Bioinorganic Chemistry](#)

## [V. References](#)

## [VI. Abbreviations](#)
