

The Future is OPEN

BIOINORGANIC CHEMISTRY

This text covers material that could be included in a one-quarter or one-semester course in bioinorganic chemistry for graduate students and advanced undergraduate students in chemistry or biochemistry. The authors believe that such a course should provide students with the background required to follow the research literature in the field. The topics were chosen to represent those areas of bioinorganic chemistry that are mature enough for textbook presentation.

Ivano Bertini, Harry B. Gray, Stephen J. Lippard, and Joan Selverstone Valentine
