

## Index

### A

#### Atomic Configuration Wavefunctions

- [10.5: Atomic Configuration Wavefunctions](#)
- [atomic term symbols](#)
  - [10.3: Coupling of Angular Momenta](#)
  - [10.4: Atomic Term Symbols and Wavefunctions](#)

#### atomic units

- [17.4: Atomic Units](#)

### B

#### Brillouin Theorem

- [18.7: Observations on Orbitals and Orbital Energies](#)

### C

#### configuration interaction

- [19.2: Different Methods](#)

#### Configuration Interaction Method

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### D

#### Density Functional Theory

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### E

#### exchange correlation potential

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### F

#### Fermi energy

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

#### Fock equations

- [18.1: Optimization of the Energy for a Multiconfiguration Wavefunction](#)

#### Fock operator

- [18.2: The Single-Determinant Wavefunction](#)

### H

#### Hessian

- [20.1: Calculations of Properties Other Than the Energy](#)

### I

#### integrated density of states

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### K

#### Koopmans' Theorem

- [18.7: Observations on Orbitals and Orbital Energies](#)

### L

#### LCAO

- [18.5: The LCAO-MO Expansion](#)

#### LS Coupling

- [10.4: Atomic Term Symbols and Wavefunctions](#)

### M

#### MCSCF method

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### O

#### Orbital Correlation Diagram

- [6.2: Orbital Correlation Diagrams - Origins of the Woodward-Hoffmann Rules](#)

#### Orbital Energies

- [18.7: Observations on Orbitals and Orbital Energies](#)

### P

#### perturbation theory

- [2.2: Perturbation Theory](#)

### R

#### reference function

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

#### reference space

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)

### S

#### Schrödinger equation

- [1.3: The Schrödinger Equation](#)

#### secular equations

- [18.1: Optimization of the Energy for a Multiconfiguration Wavefunction](#)

#### Slater determinant wavefunction

- [18.2: The Single-Determinant Wavefunction](#)

#### spin contamination

- [19.1: Introduction to Multi-Determinant Wavefunctions](#)

#### Spin Impurity Problem

- [18.3: The Unrestricted Hartree-Fock Spin Impurity Problem](#)

### T

#### Time Correlation Functions

- [15.4: Time Correlation Function Expressions for Transition Rates](#)

### V

#### Vector Coupling

- [10.3: Coupling of Angular Momenta](#)

### W

#### Weizsacker correction

- [19.4: Further Details on Implementing Multiconfigurational Methods](#)
