

# Index

## A

alkene

2.10:  $\pi$  Systems

Alkyl Complexes

2.5: Metal Alkyls

alkylphosphines

2.9: Phosphines

arene

2.10:  $\pi$  Systems

aromatic

2.10:  $\pi$  Systems

aromatic ligands

2.10:  $\pi$  Systems

arylphosphine complexes

2.9: Phosphines

Associative Substitution

4.2: Associative Ligand Substitution

## B

Berry pseudorotation

4.2: Associative Ligand Substitution

beta elimination

2.5: Metal Alkyls

beta elimination

2.5: Metal Alkyls

4.1:  $\beta$ -Elimination Reactions

binuclear oxidative additions

4.9: Oxidative Addition of Polar Reagents

Bromobenzene

1.2: What is Organometallic Chemistry?

## C

carbene

2.1: Carbenes

carbenes

2.1: Carbenes

2.7: N-heterocyclic Carbenes

Chain radical mechanisms

4.9: Oxidative Addition of Polar Reagents

Chernyaev

4.12: The trans/cis Effects and Influences

cis effect

4.12: The trans/cis Effects and Influences

cis influence

4.12: The trans/cis Effects and Influences

CO Insertions

4.6: Migratory Insertion- Introduction and CO Insertions

concerted

4.9: Oxidative Addition of Polar Reagents

concerted mechanisms

4.9: Oxidative Addition of Polar Reagents

Crabtree

2.8: Odd-numbered  $\pi$  Systems

crystal field orbitals

2.10:  $\pi$  Systems

crystal field theory

4.3: Dissociative Ligand Substitution Reactions

cyclopentadienyl ligands

2.8: Odd-numbered  $\pi$  Systems

cyclopropanations

2.1: Carbenes

## D

dative

2.7: N-heterocyclic Carbenes

2.9: Phosphines

2.10:  $\pi$  Systems

dative actor ligands

2.10:  $\pi$  Systems

dative ligands

2.4: Dative Ligands of N, O, and S

2.7: N-heterocyclic Carbenes

dearomatization

2.10:  $\pi$  Systems

decomposition

2.5: Metal Alkyls

deinsertion

4.6: Migratory Insertion- Introduction and CO Insertions

diastereomeric

2.10:  $\pi$  Systems

directing group

2.4: Dative Ligands of N, O, and S

directing group effects

2.4: Dative Ligands of N, O, and S

Dissociative Substitution

4.3: Dissociative Ligand Substitution Reactions

dissociation

4.3: Dissociative Ligand Substitution Reactions

Dissociative Ligand Substitution

4.3: Dissociative Ligand Substitution Reactions

Dissociative photochemical substitutions

4.10: Quirky Ligand Substitutions

## E

electrophile

1.2: What is Organometallic Chemistry?

electrophilic attack

2.5: Metal Alkyls

2.10:  $\pi$  Systems

elimination

4.6: Migratory Insertion- Introduction and CO Insertions

## F

Fischer carbenes

2.1: Carbenes

## H

Heck reaction

2.10:  $\pi$  Systems

Hydricity

2.6: Metal Hydrides

hydride complexes

2.6: Metal Hydrides

hydroboration

1.2: What is Organometallic Chemistry?

Hydrocyanation

4.11: Reductive Elimination- General Ideas

hydrogenation reactions

2.4: Dative Ligands of N, O, and S

4.8: Oxidative Addition of Non-polar Reagents

## I

Insertions

4.5: Migratory Insertion- 1,2-Insertions

Ionic Mechanisms

4.9: Oxidative Addition of Polar Reagents

## K

Kulinkovich cyclopropanation

2.10:  $\pi$  Systems

## L

ligand

2.1: Carbenes

4.2: Associative Ligand Substitution

4.3: Dissociative Ligand Substitution Reactions

ligand substitution

2.4: Dative Ligands of N, O, and S

2.9: Phosphines

2.10:  $\pi$  Systems

4.4: Ligand substitution

4.10: Quirky Ligand Substitutions

4.12: The trans/cis Effects and Influences

Ligands

4.11: Reductive Elimination- General Ideas

Lower

3.4: Predicting the Geometry of Organometallic Complexes

## M

metal alkyl complexes

4.1:  $\beta$ -Elimination Reactions

Metal carbenes

2.1: Carbenes

metal hydrides

2.6: Metal Hydrides

metallacyclopentane

2.10:  $\pi$  Systems

methylene

2.1: Carbenes

microscopic reversibility

4.11: Reductive Elimination- General Ideas

Migratory insertion

2.5: Metal Alkyls

2.6: Metal Hydrides

4.5: Migratory Insertion- 1,2-Insertions

4.6: Migratory Insertion- Introduction and CO Insertions

## N

nucleophilic aromatic substitution

2.10:  $\pi$  Systems

nucleophilic attack

2.5: Metal Alkyls

## O

olefin metathesis

2.1: Carbenes

2.7: N-heterocyclic Carbenes

olefin polymerization

2.10:  $\pi$  Systems

organic chemistry

2.6: Metal Hydrides

4.1:  $\beta$ -Elimination Reactions

organometallic

1.1: Resources for Organometallic Chemistry

1.2: What is Organometallic Chemistry?

4.2: Associative Ligand Substitution

## organometallic chemistry

- 1.1: Resources for Organometallic Chemistry
- 1.2: What is Organometallic Chemistry?
- 2.6: Metal Hydrides

## Organometallic Ligands

- 2: Organometallic Ligands

## oxidation

- 2.9: Phosphines
- 4.10: Quirky Ligand Substitutions

## oxidation reactions

- 2.7: N-heterocyclic Carbenes

## Oxidative addition

- 2.5: Metal Alkyls
- 2.6: Metal Hydrides
- 4.7: Oxidative Addition- General Ideas
- 4.9: Oxidative Addition of Polar Reagents
- 4.10: Quirky Ligand Substitutions
- 4.11: Reductive Elimination- General Ideas

## Oxidative Additions

- 4.8: Oxidative Addition of Non-polar Reagents

## oxidative ligation

- 4.7: Oxidative Addition- General Ideas

## oxidative ligations

- 2.6: Metal Hydrides

## oxocarbenium ion

- 2.7: N-heterocyclic Carbenes

## P

### phosphines

- 2.9: Phosphines

### photochemical excitation

- 4.10: Quirky Ligand Substitutions

### Photochemical Substitution

- 4.10: Quirky Ligand Substitutions

### pi system

- 2.8: Odd-numbered  $\pi$  Systems
- 2.10:  $\pi$  Systems

### pi systems

- 2.8: Odd-numbered  $\pi$  Systems
- 2.10:  $\pi$  Systems
