

TABLE OF CONTENTS

1: Preface

- Section 1: Why Concept Development Studies?
- Section 2: How to Study the Concept Development Studies
- Section 3: Updates in the 2012 Edition
- Section 4: Acknowledgments

2: The Atomic Molecular Theory

- Section 1: Foundation
- Section 2: Goals
- Section 3: Observation 1: Mass relationships during chemical reactions (In Progress)
- Section 4: Observation 2: Multiple Mass Ratios (In Progress)

3: Relative Atomic Masses and Empirical Formulae

- Section 1: Foundation
- Section 2: Goals
- Section 3: Observation 1: Volume Relationships in Chemical Reactions (In Progress)
- Section 4: Determination of Atomic Weights for Gaseous Elements (In Progress)
- Section 5: Determination of Atomic Weights for Non-Gaseous Elements (In Progress)
- Section 6: Moles, Molecular Formulae and Stoichiometric Calculations
- Section 7: Review and Discussion Questions (In Progress)

4: The Structure of an Atom

- Section 1: Foundation
- Section 2: Goals
- Section 3: Observation 1: Scattering of α particles by atoms
- Section 4: Observation 2: X-ray emission
- Section 5: Observation 3: Ionization energies of the atoms

5: Quantum Energy Levels In Atoms

- Section 1: Foundation
- Section 2: Foundations
- Section 3: Observation 1: The Spectrum of Hydrogen (In Progress)
- Section 4: Observation 2: The Photoelectric Effect (In Progress)

6: Covalent Bonding and Electron Pair Sharing

- Section 1: Foundation
- Section 2: Goals
- Observation 1: Valence and the Periodic Table
- Section 4: Observation 2: Compounds of Carbon and Hydrogen
- Section 5: Observation 3: Compounds of Nitrogen, Oxygen, and the Halogens
- Section 6: Interpretation of Lewis Structures
- Section 7: Extensions of the Lewis Structure Model
- Section 8: Resonance Structures
- Section 9: Review and Discussion Questions

7: Molecular Geometry and Electron Domain Theory

- Section 1: Foundation
- Section 2: Goals
- Observation 1: Geometries of molecules
- Section 4: Observation 2: Molecules with Double or Triple Bonds
- Section 5: Observation 3: Distortions from Expected Geometries
- Section 6: Review and Discussion Questions

8: Molecular Structure and Physical Properties

- Section 1: Foundation
- Section 2: Foundation
- Section 3: Observation 1: Compounds of Groups I and II
- Section 4: Observation 2: Molecular Dipole Moments
- Section 5: Observation 3: Dipole Moments in Polyatomic Molecules
- Section 6: Review and Discussion Questions

9: Chemical Bonding and Molecular Energy Levels

- Section 1: Foundation
- Section 2: Goals
- Section 3: Observation 1: Bonding with a Single Electron
- Section 4: Observation 2: Bonding and Non-Bonding in Diatomic Molecules
- Section 5: Observation 3: Ionization energies of diatomic molecule
- Section 6: Review and Discussion Questions

1: Preface to Concept Development Studies in Chemistry

2: The Atomic Molecular Theory

3: Relative Atomic Masses and Empirical Formulae

4: The Structure of an Atom

5: Quantum Energy Levels in Atoms

6: Covalent Bonding and Electron Pair Sharing

7: Molecular Geometry and Electron Domain Theory

8: Molecular Structure and Physical Properties

9: Chemical Bonding and Molecular Energy Levels

10: Energetics of Chemical Reactions

[11: The Ideal Gas Law](#)

[12: The Kinetic Molecular Theory](#)

[13: Phase Equilibrium and Intermolecular Interactions](#)

[14: Reaction Equilibrium in the Gas Phase](#)

[15: Acid-Base Equilibrium](#)

[16: Reaction Rates](#)

[17: Equilibrium and the Second Law of Thermodynamics](#)
