

## Index

### A

**absolute zero**  
11: The Ideal Gas Law

**absorbance**  
16: Reaction Rates

**acid ionization**  
15: Acid-Base Equilibrium

**acid ionization equilibrium constant**  
15: Acid-Base Equilibrium

**activation energy**  
16: Reaction Rates

**alcohol**  
6: Covalent Bonding and Electron Pair Sharing

**amines**  
6: Covalent Bonding and Electron Pair Sharing

**Amonton's law**  
11: The Ideal Gas Law

**Arrhenius plot**  
16: Reaction Rates

**atom**  
2: The Atomic Molecular Theory

**Atomic Molecular Theory**  
2: The Atomic Molecular Theory  
3: Relative Atomic Masses and Empirical Formulae  
13: Phase Equilibrium and Intermolecular Interactions

**atomic number**  
4: The Structure of an Atom

**autoionization**  
15: Acid-Base Equilibrium

**Avogadro's Hypothesis**  
3: Relative Atomic Masses and Empirical Formulae  
11: The Ideal Gas Law  
13: Phase Equilibrium and Intermolecular Interactions

### B

**bimolecular reaction**  
16: Reaction Rates

**binary acid**  
15: Acid-Base Equilibrium

**boiling point**  
13: Phase Equilibrium and Intermolecular Interactions

**bond energy**  
6: Covalent Bonding and Electron Pair Sharing  
10: Energetics of Chemical Reactions

**bond length**  
6: Covalent Bonding and Electron Pair Sharing

**bond strength**  
6: Covalent Bonding and Electron Pair Sharing

**bonding**  
9: Chemical Bonding and Molecular Energy Levels

**Boyle's Law**  
11: The Ideal Gas Law  
12: The Kinetic Molecular Theory

### C

**calorimetry**  
10: Energetics of Chemical Reactions

**carboxylic acid**  
15: Acid-Base Equilibrium

### Charles's Law

11: The Ideal Gas Law  
12: The Kinetic Molecular Theory  
13: Phase Equilibrium and Intermolecular Interactions

**chemical bonding**  
9: Chemical Bonding and Molecular Energy Levels

**chemical formula**  
2: The Atomic Molecular Theory

**compounds**  
2: The Atomic Molecular Theory

**Concept Development Studies in Chemistry**  
1: Preface to Concept Development Studies in Chemistry

**confinement energy**  
5: Quantum Energy Levels in Atoms

**covalent bond**  
6: Covalent Bonding and Electron Pair Sharing

### D

**Dalton's Law of Partial Pressure**  
11: The Ideal Gas Law  
14: Reaction Equilibrium in the Gas Phase

**diatomic molecule**  
7: Molecular Geometry and Electron Domain Theory

**diatomic molecules**  
9: Chemical Bonding and Molecular Energy Levels

**dimerization**  
14: Reaction Equilibrium in the Gas Phase

**dipole moment**  
8: Molecular Structure and Physical Properties

**dispersion forces**  
12: The Kinetic Molecular Theory

**double bond**  
6: Covalent Bonding and Electron Pair Sharing

**dynamic equilibrium**  
13: Phase Equilibrium and Intermolecular Interactions

### E

**ED**  
7: Molecular Geometry and Electron Domain Theory

**electron domain theory**  
7: Molecular Geometry and Electron Domain Theory  
8: Molecular Structure and Physical Properties

**electron orbital**  
5: Quantum Energy Levels in Atoms

**electronegativity**  
8: Molecular Structure and Physical Properties

**elementary process**  
16: Reaction Rates

**elements**  
2: The Atomic Molecular Theory

**empirical formula**  
3: Relative Atomic Masses and Empirical Formulae

**endothermic reaction**  
10: Energetics of Chemical Reactions

**energy levels**  
5: Quantum Energy Levels in Atoms

**enthalpy**  
10: Energetics of Chemical Reactions

### entropy

17: Equilibrium and the Second Law of Thermodynamics

**equilibrium**  
15: Acid-Base Equilibrium

**ethers**  
6: Covalent Bonding and Electron Pair Sharing

**exothermic reaction**  
10: Energetics of Chemical Reactions

**expanded valence**  
7: Molecular Geometry and Electron Domain Theory

### F

**first order reaction**  
16: Reaction Rates

**Foundation**  
1: Preface to Concept Development Studies in Chemistry

**free energy**  
17: Equilibrium and the Second Law of Thermodynamics

**frequency factor**  
16: Reaction Rates

### H

**half life**  
16: Reaction Rates

**heat capacity**  
10: Energetics of Chemical Reactions

**Hess' Law**  
10: Energetics of Chemical Reactions

**hydrogen bonding**  
12: The Kinetic Molecular Theory

**hydrolysis**  
15: Acid-Base Equilibrium

### I

**ideal gas law**  
3: Relative Atomic Masses and Empirical Formulae  
11: The Ideal Gas Law  
12: The Kinetic Molecular Theory  
14: Reaction Equilibrium in the Gas Phase

**ionization energies**  
9: Chemical Bonding and Molecular Energy Levels

**ionization energy**  
4: The Structure of an Atom

**isomers**  
6: Covalent Bonding and Electron Pair Sharing

### K

**kinetic molecular theory**  
13: Phase Equilibrium and Intermolecular Interactions  
14: Reaction Equilibrium in the Gas Phase  
16: Reaction Rates  
17: Equilibrium and the Second Law of Thermodynamics

**Kinetic Molecular Theory of Gases**  
12: The Kinetic Molecular Theory

## L

- law of combining volumes
  - 3: Relative Atomic Masses and Empirical Formulae
  - 12: The Kinetic Molecular Theory
- Law of Conservation of Mass
  - 2: The Atomic Molecular Theory
  - 3: Relative Atomic Masses and Empirical Formulae
- Law of Definite Proportions
  - 2: The Atomic Molecular Theory
  - 3: Relative Atomic Masses and Empirical Formulae
- Law of Mass Action
  - 14: Reaction Equilibrium in the Gas Phase
- Law of Multiple Proportions
  - 2: The Atomic Molecular Theory
  - 3: Relative Atomic Masses and Empirical Formulae
- Le Chatelier's principle
  - 15: Acid-Base Equilibrium
- Lewis structure model
  - 7: Molecular Geometry and Electron Domain Theory
  - 8: Molecular Structure and Physical Properties
- Lewis structures
  - 6: Covalent Bonding and Electron Pair Sharing
- London forces
  - 12: The Kinetic Molecular Theory
- lone pairs
  - 7: Molecular Geometry and Electron Domain Theory

## M

- microstates
  - 17: Equilibrium and the Second Law of Thermodynamics
- mole
  - 3: Relative Atomic Masses and Empirical Formulae
- mole fraction
  - 11: The Ideal Gas Law
  - 17: Equilibrium and the Second Law of Thermodynamics
- Molecular Energy Levels
  - 9: Chemical Bonding and Molecular Energy Levels
- molecular formula
  - 3: Relative Atomic Masses and Empirical Formulae
- Molecular orbital diagram
  - 9: Chemical Bonding and Molecular Energy Levels

## N

- nucleus
  - 4: The Structure of an Atom

## O

- observations
  - 1: Preface to Concept Development Studies in Chemistry
- Occam's razor
  - 1: Preface to Concept Development Studies in Chemistry
- octahedron
  - 7: Molecular Geometry and Electron Domain Theory
- orbital
  - 5: Quantum Energy Levels in Atoms
- oxyacid
  - 15: Acid-Base Equilibrium

## P

- partial pressure
  - 11: The Ideal Gas Law
- particles
  - 3: Relative Atomic Masses and Empirical Formulae
- Particulate
  - 2: The Atomic Molecular Theory
- pH
  - 15: Acid-Base Equilibrium
- phase diagram
  - 13: Phase Equilibrium and Intermolecular Interactions
- phase equilibrium
  - 13: Phase Equilibrium and Intermolecular Interactions
- phase transition
  - 13: Phase Equilibrium and Intermolecular Interactions
- photoionization
  - 5: Quantum Energy Levels in Atoms
- photons
  - 5: Quantum Energy Levels in Atoms
- polarizability
  - 12: The Kinetic Molecular Theory
- polyatomic molecule
  - 7: Molecular Geometry and Electron Domain Theory
- probability distribution
  - 5: Quantum Energy Levels in Atoms

## Q

- quantum number
  - 5: Quantum Energy Levels in Atoms

## R

- rate determining step
  - 16: Reaction Rates
- rate law
  - 16: Reaction Rates
- reaction equilibrium
  - 14: Reaction Equilibrium in the Gas Phase
- reaction equilibrium constant
  - 14: Reaction Equilibrium in the Gas Phase
- reaction intermediate
  - 16: Reaction Rates
- reaction mechanism
  - 16: Reaction Rates

## S

- Second Law of Thermodynamics
  - 17: Equilibrium and the Second Law of Thermodynamics
- second order reaction
  - 16: Reaction Rates
- specific heat
  - 10: Energetics of Chemical Reactions
- spectrum
  - 5: Quantum Energy Levels in Atoms
- standard enthalpy of formation
  - 10: Energetics of Chemical Reactions

## standard formation reaction

- 10: Energetics of Chemical Reactions
- state function
  - 10: Energetics of Chemical Reactions
- strong acid
  - 15: Acid-Base Equilibrium
- sublimation
  - 13: Phase Equilibrium and Intermolecular Interactions
- Subshells
  - 5: Quantum Energy Levels in Atoms

## T

- third order reaction
  - 16: Reaction Rates
- threshold frequency
  - 5: Quantum Energy Levels in Atoms
- trigonal bipyramidal
  - 7: Molecular Geometry and Electron Domain Theory
- Trigonal Planar
  - 7: Molecular Geometry and Electron Domain Theory
- triple bond
  - 6: Covalent Bonding and Electron Pair Sharing
- triple point
  - 13: Phase Equilibrium and Intermolecular Interactions

## U

- uncertainty principle
  - 5: Quantum Energy Levels in Atoms

## V

- valence
  - 6: Covalent Bonding and Electron Pair Sharing
- Valence Shell
  - 4: The Structure of an Atom
- valence shell electron pair repulsion theory
  - 7: Molecular Geometry and Electron Domain Theory
- vapor pressure
  - 13: Phase Equilibrium and Intermolecular Interactions
- volatility
  - 13: Phase Equilibrium and Intermolecular Interactions
- VSEPR
  - 7: Molecular Geometry and Electron Domain Theory

## W

- wave function
  - 5: Quantum Energy Levels in Atoms
- weak acid
  - 15: Acid-Base Equilibrium

## Z

- zeroth order reaction
  - 16: Reaction Rates
