

Class 4 - Spherical Boundaries and Lenses

Learning Objectives in this class:

- Define a spherical boundary and a spherical lens
- Illustrate the image of an object through a spherical boundary
- Estimate the focal length of a lens based on its refractive index, its radii, and the refractive index of the surrounding medium.
- Illustrate the image of an object through a spherical lens
- Differentiate the optical tracing between converging and diverging lenses

Class 4 - Spherical Boundaries and Lenses is shared under a [CC BY-NC-SA](#) license and was authored, remixed, and/or curated by LibreTexts.
