

Index

A

aberration
11.10.3: Spherical Mirrors
AC circuits
10.6: Resonance in an AC Circuit
AC current
10.2: AC Sources
AC voltage
10.2: AC Sources
accommodation
11.10.6: The Eye
alternating current
10.2: AC Sources
ampere (unit)
5.2: Electrical Current
Ampere's Law
8.4: Ampère's Law
8.5: Solenoids and Toroids
Ampere' law
8.5: Solenoids and Toroids
Ampere's law
8.4: Ampère's Law
angular magnification
11.10.8: The Simple Magnifier
apparent depth
11.10.4: Images Formed by Refraction
area vector
2.2: Electric Flux
average power (AC circuit)
10.5: Power in an AC Circuit

B

bandwidth
10.6: Resonance in an AC Circuit
BCS theory
5.7: Superconductors
birefringence
11.7: Polarization
Bragg planes
13.7: X-Ray Diffraction
Brewster's angle
11.7: Polarization
Brewster's law
11.7: Polarization

C

camera
11.10.7: The Camera
Capacitance
4.2: Capacitors and Capacitance
4.4: Capacitor with a Dielectric
capacitive reactance
10.3: Simple AC Circuits
capacitor
4.2: Capacitors and Capacitance
4.3: Energy Stored in a Capacitor
capacitors in parallel
6.5: Capacitors in Series and in Parallel
capacitors in series
6.5: Capacitors in Series and in Parallel
Cassegrain design
11.10.9: Microscopes and Telescopes
cern
14.10: Relativistic Energy

charging by induction
1.3: Conductors, Insulators, and Charging by Induction
circuit
5.2: Electrical Current
classical (Galilean) velocity addition
14.7: Relativistic Velocity Transformation
coaxial cable
4.2: Capacitors and Capacitance
coherent waves
12.2: Young's Double-Slit Interference
coma (optics)
11.10.3: Spherical Mirrors
compound microscope
11.10.9: Microscopes and Telescopes
concave mirror
11.10.3: Spherical Mirrors
conduction electron
1.3: Conductors, Insulators, and Charging by Induction
conductor
1.3: Conductors, Insulators, and Charging by Induction
1.6.1: Conductors and the Electric Field
Continuous Charge Distribution
1.7: Calculating Electric Fields of Charge Distributions
conventional current
5.2: Electrical Current
converging (or convex) lens
11.10.5: Thin Lenses
converging lens
11.10.5: Thin Lenses
convex mirror
11.10.3: Spherical Mirrors
Cooper pairs
5.7: Superconductors
corner reflector
11.5: The Law of Reflection
cosmic rays
7.4: Motion of a Charged Particle in a Magnetic Field
coulomb
1.2: Electric Charge
Coulomb force
1.4: Coulomb's Law
Coulomb's constant
1.4: Coulomb's Law
Coulomb's Law
1.4: Coulomb's Law
critical angle
11.6.1: Total Internal Reflection
Critical temperature
5.7: Superconductors
Curie temperature
8.6.1: Magnets
current density
5.3: Model of Conduction in Metals
curved mirror
11.10.3: Spherical Mirrors
cylindrical symmetry
2.4: Applying Gauss's Law

D

destructive interference for a single slit
13.2: Single-Slit Diffraction
diamagnetic materials
8.6: Magnetism in Matter
dielectric
4.2: Capacitors and Capacitance
4.4: Capacitor with a Dielectric
4.5: Molecular Model of a Dielectric
dielectric constant
4.4: Capacitor with a Dielectric
dielectric strength
4.5: Molecular Model of a Dielectric
Dielectric breakdown
4.5: Molecular Model of a Dielectric
diffraction
13: Diffraction
13.2: Single-Slit Diffraction
diffraction grating
12.4: Multiple-Slit Interference
13.5: Diffraction Gratings
diffraction limit
13.6: Circular Apertures and Resolution
digital signal processing
9.9: Mutual Inductance
diode
5.5: Ohm's Law
dipole
1.3: Conductors, Insulators, and Charging by Induction
direct current
10.2: AC Sources
direction of polarization
11.7: Polarization
Dispersion
11.6.2: Dispersion
Displacement current
11.2: Maxwell's Equations and Electromagnetic Waves
diverging (or concave) lens
11.10.5: Thin Lenses
diverging lens
11.10.5: Thin Lenses
drift velocity
5.3: Model of Conduction in Metals

E

Eddy Currents
9.6: Eddy Currents
electric charge
1.2: Electric Charge
Electric dipole
3.4: Calculations of Electric Potential
electric dipole moment
3.4: Calculations of Electric Potential
electric field
1.5: Electric Field
1.6: Electric Field Lines
3.5: Determining Field from Potential
Electric Field inside a Conductors
2.5: Conductors in Electrostatic Equilibrium
electric flux
2.2: Electric Flux
electric force
1.2: Electric Charge

electric potential

- 3: Electric Potential
- 3.3: Electric Potential and Potential Difference
- 3.4: Calculations of Electric Potential
- 3.5: Determining Field from Potential

electric potential difference

- 3.3: Electric Potential and Potential Difference

Electric potential energy

- 3.2: Electric Potential Energy

electrical conductivity

- 5.4: Resistivity and Resistance

electrical current

- 5.2: Electrical Current

electrical energy

- 5.6: Electrical Energy and Power

electrical power

- 5.6: Electrical Energy and Power

Electromagnetic induction

- 9: Electromagnetic Induction

Electromagnetic Spectrum

- 11.3: The Electromagnetic Spectrum

electromotive force (emf)

- 6.2: Electromotive Force

Electron

- 1.2: Electric Charge

electrostatic attraction

- 1.2: Electric Charge

electrostatic repulsion

- 1.2: Electric Charge

electrostatics

- 1.4: Coulomb's Law

Electrical power

- 5.6: Electrical Energy and Power

ENDOSCOPES

- 11.6.1: Total Internal Reflection

Energy Density

- 4.3: Energy Stored in a Capacitor

equipotential line

- 3.6: Equipotential Surfaces and Conductors

Equipotential Surfaces

- 3.6: Equipotential Surfaces and Conductors

equivalent resistance

- 6.3: Resistors in Series and Parallel

event

- 14.6: The Lorentz Transformation

eyepiece

- 11.10.9: Microscopes and Telescopes

F

far point

- 11.10.6: The Eye

Faraday's Law

- 9.2: Faraday's Law

farsightedness

- 11.10.6: The Eye

ferromagnetic materials

- 8.6: Magnetism in Matter

fiber optics

- 11.6.1: Total Internal Reflection

field line

- 1.6: Electric Field Lines

field lines

- 1.6: Electric Field Lines

first focus or object focus

- 11.10.4: Images Formed by Refraction

first postulate of special relativity

- 14.2: Invariance of Physical Laws

flux

- 2: Gauss's Law
- 2.2: Electric Flux

focal length

- 11.10.3: Spherical Mirrors

focal plane

- 11.10.5: Thin Lenses

focal point

- 11.10.3: Spherical Mirrors

free electrons

- 2.5: Conductors in Electrostatic Equilibrium

fringes

- 12.3: Mathematics of Interference

G

Galilean relativity

- 14.2: Invariance of Physical Laws

Galilean transformation

- 14.6: The Lorentz Transformation

gamma ray

- 11.3: The Electromagnetic Spectrum

gauss (unit)

- 7.3: Magnetic Fields and Lines

Gauss's law

- 2: Gauss's Law
- 2.3: Explaining Gauss's Law
- 2.4: Applying Gauss's Law

Gaussian surface

- 2.3: Explaining Gauss's Law
- 2.4: Applying Gauss's Law

geometric optics

- 11.4: The Propagation of Light
- 11.10: Geometric Optics and Image Formation

grounding

- 3.6: Equipotential Surfaces and Conductors

H

Hall effect

- 7.5.2: The Hall Effect

helical motion

- 7.4: Motion of a Charged Particle in a Magnetic Field

henry (unit)

- 9.9: Mutual Inductance

horizontally polarized

- 11.7: Polarization

hyperopia

- 11.10.6: The Eye

hysteresis

- 8.6: Magnetism in Matter

I

image distance

- 11.10.2: Images Formed by Plane Mirrors

image focus

- 11.10.4: Images Formed by Refraction

impedance

- 10.4: RLC Series Circuits with AC

incoherent

- 12.2: Young's Double-Slit Interference

index of refraction

- 11.4: The Propagation of Light
- 11.6: Refraction
- 11.6.2: Dispersion

induced charged surfaces

- 4.5: Molecular Model of a Dielectric

Induced Electric Fields

- 4.5: Molecular Model of a Dielectric
- 9.5: Induced Electric Fields

induced emf

- 9.2: Faraday's Law
- 9.5: Induced Electric Fields

induced polarization

- 4.5: Molecular Model of a Dielectric

inductance

- 9.9: Mutual Inductance

inductive reactance

- 10.3: Simple AC Circuits

inductive time constant

- 9.12: RL Circuits

inductors

- 9.10: Self-Inductance and Inductors

inertial frame of reference

- 14.2: Invariance of Physical Laws

Inertial Frames

- 14.2: Invariance of Physical Laws

infinite plane

- 1.7: Calculating Electric Fields of Charge Distributions

infinite straight wire

- 1.7: Calculating Electric Fields of Charge Distributions

infrared radiation

- 11.3: The Electromagnetic Spectrum

insulator

- 1.3: Conductors, Insulators, and Charging by Induction

intensity

- 13.3: Intensity in Single-Slit Diffraction

interference

- 12.3: Mathematics of Interference

interference order

- 12.3: Mathematics of Interference

internal resistance

- 6.2: Electromotive Force

ion

- 1.2: Electric Charge

iridescence

- 13.5: Diffraction Gratings

J

Josephson effect

- 5.7: Superconductors

Josephson junction

- 5.7: Superconductors

K

Kirchhoff's First Rule

- 6.4: Kirchhoff's Rules

Kirchhoff's Second Rule

- 6.4: Kirchhoff's Rules

Kirchhoff's junction rule

- 6.3: Resistors in Series and Parallel
- 6.4: Kirchhoff's Rules

Kirchhoff's loop rule

- 6.3: Resistors in Series and Parallel
- 6.4: Kirchhoff's Rules

Klein bottle

- 2.3: Explaining Gauss's Law

L

law of conservation of charge

- 1.2: Electric Charge

law of reflection

11.5: The Law of Reflection

law of refraction

11.6: Refraction

LC circuit

9.12.1: Oscillations in an LC Circuit

Length contraction

14.5: Length Contraction

Lenz's Law

9.3: Lenz's Law

light

11.4: The Propagation of Light

light cone

14.6: The Lorentz Transformation

linear charge density

1.7: Calculating Electric Fields of Charge Distributions

linear magnification

11.10.3: Spherical Mirrors

Lorentz force

11.2: Maxwell's Equations and Electromagnetic Waves

Lorentz transformations

14.6: The Lorentz Transformation

M

magnetic damping

9.6: Eddy Currents

Magnetic dipole

7.5.1: Force and Torque on a Current Loop

magnetic dipole moment

7.5.1: Force and Torque on a Current Loop

magnetic domains
