

TABLE OF CONTENTS

Licensing

1: Probability Theory

- 1.1: What is Probability?
- 1.2: Combining Probabilities
- 1.3: Mean, Variance, and Standard Deviation
- 1.4: Continuous Probability Distributions
- 1.5: Exercises

2: Wave-Particle Duality

- 2.1: Wavefunctions
- 2.2: Plane-Waves
- 2.3: Representation of Waves via Complex Functions
- 2.4: Classical Light-Waves
- 2.5: Photoelectric Effect
- 2.6: Quantum Theory of Light
- 2.7: Classical Interferences of Light Waves
- 2.8: Quantum Interference of Light
- 2.9: Particles
- 2.10: Wave-Packets
- 2.11: Evolution of Wave-Packets
- 2.12: Schrodinger's Equation and Wavefunction Collapse
- 2.13: Exercises

3: Fundamentals of Quantum Mechanics

- 3.1: Schrodinger's Equation
- 3.2: Normalization of the Wavefunction
- 3.3: Expectation Values (Averages) and Variances
- 3.4: Ehrenfest's Theorem
- 3.5: Operators
- 3.6: Momentum Representation
- 3.7: Heisenberg's Uncertainty Principle
- 3.8: Eigenstates and Eigenvalues
- 3.9: Measurement
- 3.10: Stationary States
- 3.11: Exercises

4: One-Dimensional Potentials

- 4.1: Infinite Potential Well
- 4.2: Square Potential Barrier
- 4.3: WKB Approximation
- 4.4: Cold Emission
- 4.5: Alpha Decay
- 4.6: Square Potential Well
- 4.7: Simple Harmonic Oscillator
- 4.E: One-Dimensional Potentials (Exercises)

5: Multi-Particle Systems

- 5.1: Fundamental Concepts of Multi-Particle Systems
- 5.2: Non-interacting Particles
- 5.3: Two-Particle Systems
- 5.4: Identical Particles
- 5.E: Multi-Particle Systems (Exercises)

6: Three-Dimensional Quantum Mechanics

- 6.1: Fundamental Concepts
- 6.2: Particle in Box
- 6.3: Degenerate Electron Gases
- 6.4: White Dwarf Stars
- 6.5: Exercises

7: Orbital Angular Momentum

- 7.1: Angular Momentum Operators
- 7.2: Representation of Angular Momentum
- 7.3: Eigenstates of Angular Momentum
- 7.4: Eigenvalues of L_z
- 7.5: Eigenvalues of L^2
- 7.6: Spherical Harmonics
- 7.E: Orbital Angular Momentum (Exercises)

8: Central Potentials

- 8.1: Derivation of Radial Equation
- 8.2: Infinite Spherical Potential Well
- 8.3: Hydrogen Atom
- 8.4: Rydberg Formula
- 8.E: Central Potentials (Exercises)

9: Spin Angular Momentum

- 9.1: Spin Operators
- 9.2: Spin Space
- 9.3: Eigenstates of S_z and S^2
- 9.4: Pauli Representation
- 9.5: Spin Precession
- 9.E: Spin Angular Momentum (Exercises)

10: Addition of Angular Momentum

- 10.1: General Principles of Angular Momentum
- 10.2: Angular Momentum in Hydrogen Atom
- 10.3: Two Spin One-Half Particles
- 10.E: Addition of Angular Momentum (Exercises)

11: Time-Independent Perturbation Theory

- 11.1: Exercises
- 11.2: Improved Notation
- 11.3: Two-State System

- 11.4: Non-Degenerate Perturbation Theory
- 11.5: Quadratic Stark Effect
- 11.6: Degenerate Perturbation Theory
- 11.7: Linear Stark Effect
- 11.8: Fine Structure of Hydrogen
- 11.9: Zeeman Effect
- 11.10: Hyperfine Structure

12: Time-Dependent Perturbation Theory

- 12.1: Preliminary Analysis
- 12.2: Two-State System
- 12.3: Spin Magnetic Resonance
- 12.4: Perturbation Expansion
- 12.5: Harmonic Perturbation
- 12.6: Electromagnetic Radiation
- 12.7: Electric Dipole Approximation
- 12.8: Spontaneous Emission
- 12.9: Radiation from Harmonic Oscillator
- 12.10: Selection Rules (Hydrogen Atoms)
- 12.11: 2P-1S Transitions in Hydrogen
- 12.12: Intensity Rules
- 12.13: Forbidden Transitions
- 12.E: Time-Dependent Perturbation Theory (Exercises)

13: Variational Methods

- 13.1: Variational Principle
- 13.2: Helium Atom
- 13.3: Hydrogen Molecule Ion

14: Scattering Theory

- 14.1: Fundamentals of Scattering Theory
- 14.2: Born Approximation
- 14.3: Partial Waves
- 14.4: Optical Theorem
- 14.5: Determination of Phase-Shifts
- 14.6: Hard-Sphere Scattering
- 14.7: Low-Energy Scattering
- 14.8: Resonances

15: Bibliography

- 15.1: Section 1-
- 15.2: Section 2-
- 15.3: Section 3-
- 15.4: Section 4-
- 15.5: Section 5-
- 15.6: Section 6-
