

TABLE OF CONTENTS

Licensing

Summary and Author Biography

1: Introduction to Classical Mechanics

- 1.1: Dimensions and Units
- 1.2: Dimensional Analysis
- 1.E: Introduction to Classical Mechanics (Exercises)

2: Forces

- 2.1: Newton's Laws of Motion
- 2.2: Force Laws
- 2.3: Equations of Motion
- 2.4: Multiple Forces
- 2.5: Statics
- 2.6: Solving the Equations of Motion in Three Special Cases
- 2.E: Forces (Exercises)

3: Energy

- 3.1: Work
- 3.2: Kinetic Energy
- 3.3: Potential Energy
- 3.4: Conservation of Energy
- 3.5: Energy Landscapes
- 3.E: Energy (Exercises)

4: Momentum

- 4.1: Center of Mass
- 4.2: Conservation of Momentum
- 4.3: Reference Frames
- 4.4: Rocket Science
- 4.5: Collisions
- 4.6: Totally Inelastic Collisions
- 4.7: Totally Elastic Collisions
- 4.8: Elastic Collisions in the COM Frame
- 4.E: Momentum (Exercises)

5: Rotational Motion, Torque and Angular Momentum

- 5.1: Rotation Basics
- 5.2: Centripetal Force
- 5.3: Torque
- 5.4: Moment of Inertia
- 5.5: Kinetic Energy of Rotation
- 5.6: Angular Momentum
- 5.7: Conservation of Angular Momentum
- 5.8: Rolling and Slipping Motion

- 5.9: Precession and Nutation
- 5.E: Rotational Motion, Torque and Angular Momentum (Exercises)

6: General Planar Motion

- 6.1: Projectile Motion
- 6.2: General Planar Motion in Polar Coordinates
- 6.3: Motion Under the Action of a Central Force
- 6.4: Kepler's Laws
- 6.E: General Planar Motion (Exercises)

7: General Rotational Motion

- 7.1: Linear and Angular Velocity
- 7.2: Rotating Reference Frames
- 7.3: Rotations About an Arbitrary Axis
- 7.E: General Rotational Motion (Exercises)

8: Oscillations

- 8.1: Oscillatory Motion
- 8.2: Damped Harmonic Oscillator
- 8.3: Driven Harmonic Oscillator
- 8.4: Coupled Oscillators
- 8.E: Oscillations (Exercises)

9: Waves

- 9.1: Sinusoidal Waves
- 9.2: The Wave Equation
- 9.3: Solution of the One-Dimensional Wave Equation
- 9.4: Wave Superposition
- 9.5: Amplitude Modulation
- 9.6: Sound Waves
- 9.7: The Doppler Effect
- 9.E: Waves (Exercises)

10: Einstein's Postulates

- 10.1: An Old and a New Axiom
- 10.2: Consequences of Einstein's Postulates
- 10.E: Einstein's Postulates (Exercises)

11: Lorentz Transformations

- 11.1: Classical Case- Galilean Transformations
- 11.2: Derivation of the Lorentz Transformations
- 11.3: Some Consequences of the Lorentz Transformations
- 11.4: Rapidity and Repeated Lorentz Transformations
- 11.E: Lorentz Transformations (Exercises)

12: Spacetime Diagrams

- 12.1: Time Dialation and Space Contraction Revisited
- 12.2: An Invariant Measure of Length
- 12.3: Worldlines and Proper Time

- [12.E: Spacetime Diagrams \(Exercises\)](#)

13: Position, Energy and Momentum in Special Relativity

- [13.1: The Position Four-Vector](#)
- [13.2: Lorentz Transformation Matrix and Metric Tensor](#)
- [13.3: Velocity and Momentum Four-Vectors](#)
- [13.4: Relativistic Energy](#)
- [13.5: Conservation of Energy and Momentum](#)
- [13.E: Position, Energy and Momentum in Special Relativity \(Exercises\)](#)

14: Relativistic Collisions

- [14.1: Prelude to Relativistic Collisions](#)
- [14.2: Photons](#)
- [14.3: Totally Inelastic Collision](#)
- [14.4: Radioactive Decay and the Center-of-Momentum Frame](#)
- [14.5: Totally Elastic Collision - Compton Scattering](#)
- [14.E: Relativistic Collisions \(Exercises\)](#)

15: Relativistic Forces and Waves

- [15.1: The Force Four-Vector](#)
- [15.2: The Four-Acceleration](#)
- [15.3: Relativistic Waves](#)
- [15.E: Relativistic Forces and Waves \(Exercises\)](#)

16: Appendices

- [16.A: Math](#)
- [16.B: Some Equations and Constants](#)
