

TABLE OF CONTENTS

Licensing

1: Motion

- 1.1: Vectors
- 1.2: Vector Multiplication
- 1.3: Straight-Line Motion
- 1.4: Kinematics
- 1.5: Graphing
- 1.6: Motion in Multiple Dimensions
- 1.7: Examples of 2-Dimensional Motion
- 1.8: Relative Motion

2: Force

- 2.1: Properties of Force
- 2.2: Effects of Force
- 2.3: Types of Forces
- 2.4: Problem Solving

3: Work and Energy

- 3.1: The Work - Energy Theorem
- 3.2: Conservative and Non-Conservative Forces
- 3.3: Mechanical Advantage and Power
- 3.4: Energy Conservation Models
- 3.5: Thermal Energy
- 3.6: Force and Potential Energy
- 3.7: Energy Diagrams

4: Linear Momentum

- 4.1: Repackaging Newton's Second Law
- 4.2: Center of Mass
- 4.3: Momenta of Systems
- 4.4: Momentum and Energy
- 4.5: Collisions
- 4.6: Problem Solving

5: Rotations and Rigid Bodies

- 5.1: Rotational Kinematics
- 5.2: Non-Inertial Frames
- 5.3: Rotational Inertia
- 5.4: Dynamics of Rotating Objects
- 5.5: Torque
- 5.6: Static Equilibrium

6: Angular Momentum

- [6.1: Linking Linear and Angular Momentum](#)
- [6.2: Effects of Torque](#)
- [6.3: Applications of Angular Momentum Conservation](#)

7: Gravitation

- [7.1: Universal Gravitation](#)
- [7.2: Kepler's Laws](#)
- [7.3: Energy in Gravitational Systems](#)

8: Small Oscillations

- [8.1: Simple Harmonic Motion](#)
- [8.2: Other Restoring Forces](#)
- [8.3: Damping and Resonance](#)
- [8.4: Coupled Oscillators and Normal Modes](#)

Preface
