

## CHAPTER OVERVIEW

### 4: Statistical Ensembles

- [4.1: Microcanonical Ensemble \( \$\mu\$ CE\)](#)
- [4.2: The Quantum Mechanical Trace](#)
- [4.3: Thermal Equilibrium](#)
- [4.4: Ordinary Canonical Ensemble \(OCE\)](#)
- [4.5: Grand Canonical Ensemble \(GCE\)](#)
- [4.6: Statistical Ensembles from Maximum Entropy](#)
- [4.7: Ideal Gas Statistical Mechanics](#)
- [4.8: Selected Examples](#)
- [4.9: Statistical Mechanics of Molecular Gases](#)
- [4.10: Appendix I- Additional Examples](#)
- [4.S: Summary](#)

*Thumbnail: A model of noninteracting spin dimers on a lattice. Each red dot represents a classical spin for which  $\sigma_j = \pm 1$ .*
