Introductory Physics

INTRODUCTORY PHYSICS: BUILDING MODELS TO DESCRIBE OUR WORLD

This is an open-access textbook for calculus-based introductory physics courses. The textbook is specifically intended for a flipped-classroom approach, wherein students complete readings at home and the material is then discussed in class. The textbook thus contains questions and activities to engage readers. This text also includes a curriculum in experimental physics, detailing the scientific method and process, suggesting experiments to perform at home and in the lab.
