Agenda

5: Flow, Transport and Exponential

- 5.0: Overview of Flow, Transport and Exponential
- 5.1: Steady-State Energy-Density Model
- 5.2: Static Fluids
- 5.3: Fluid Flow
- 5.4: Electric Circuits
- 5.5: Resistors in Parallel and Series
- 5.6: Circuit Problem Solving
- 5.7: The Linear Transport Model
- 5.8: Exponential Change Model
- 5.9: Exponential Fluid Flow
- 5.10: Exponential Charge Flow
- 5.11: Wrap up

6: Newton's Laws of Motion

- 6.0: Overview
- 6.1: Overview of Vectors
- 6.2: The Force model
- 6.3: Applying the Force Model
- 6.4 : Wrap Up

7: Momentum

- 7.0: Overview
- 7.1: Linear Momentum
- 7.2: Applications of Momentum Conservation
- 7.3: Angular Motion
- 7.4: Rotational Inertia
- 7.5: Torque
- 7.6: Static Equilibrium
- 7.7: Angular Momentum
- 7.8: Summary of Linear and Angular Analogs
- 7.9: Wrap-up

8: Force and Motion

- 8.0: Overview
- 8.1: Graphing Motion
- 8.2: Kinematics
- 8.3: Wrap-Up
