

CHAPTER OVERVIEW

13: Thermodynamics

[13.1: Introduction](#)

[13.2: Introducing Temperature](#)

[13.3: Heat and the First Law](#)

[13.4: The Second Law and Entropy](#)

[13.5: In Summary](#)

[13.6: Examples](#)

[13.7: Exercises](#)

Thumbnail: Natural convection plays an important role in heat transfer inside this pot of water. Once conducted to the inside, heat transfer to other parts of the pot is mostly by convection. The hotter water expands, decreases in density, and rises to transfer heat to other regions of the water, while colder water sinks to the bottom. This process keeps repeating.
