

Index

A

Angular acceleration

8.4: Motion on a Circle (Or Part of a Circle)

Angular momentum

9.2: Angular Momentum

angular velocity

9.3: The Cross Product and Rotational Quantities

antinodes

12.2: Standing Waves and Resonance

B

Boltzmann constant

13.2: Introducing Temperature

Bulk modulus

12.1: Traveling Waves

C

carnot machine

13.4: The Second Law and Entropy

Center of mass

3.3: Extended Systems and Center of Mass

Centrifugal force

8.4: Motion on a Circle (Or Part of a Circle)

8.7: Advanced Topics

centripetal acceleration

8.4: Motion on a Circle (Or Part of a Circle)

Centripetal force

8.4: Motion on a Circle (Or Part of a Circle)

Conservation of Momentum

3.4: In Summary

Coriolis Force

8.7: Advanced Topics

Cross product

9.2: Angular Momentum

D

Dispersion

12.6: Advanced Topics

E

eccentricity

10.1: The Inverse-Square Law

Elastic collision

4.1: Kinetic Energy

ellipse

10.1: The Inverse-Square Law

energy flux

12.1: Traveling Waves

entropy

13.4: The Second Law and Entropy

Equivalence Principle

10.2: Weight, Acceleration, and the Equivalence Principle

event horizon

10.2: Weight, Acceleration, and the Equivalence Principle

F

first law of thermodynamics

13.3: Heat and the First Law

focus

10.1: The Inverse-Square Law

force

2.1: The Law of Inertia

frequency

11.1: Introduction- The Physics of Oscillations

fundamental frequency

12.2: Standing Waves and Resonance

H

Heat capacity

13.2: Introducing Temperature

I

Ideal gas

13.2: Introducing Temperature

impedance

12.1: Traveling Waves

Inelastic collision

3.1: Inertia

4.1: Kinetic Energy

intensity

12.1: Traveling Waves

K

Kepler's laws

10.1: The Inverse-Square Law

Kinematics

1.2: Position, Displacement, Velocity

kinetic energy

4.1: Kinetic Energy

Kinetic Friction

6.3: Forces Not Derived From a Potential Energy

L

Law of inertia

2.1: The Law of Inertia

longitudinal wave

12.1: Traveling Waves

M

Moment of Inertia

9.1: Rotational Kinetic Energy, and Moment of Inertia

momentum

3.2: Momentum

N

Newton's First Law

6.1: Force

Newton's Second Law

6.1: Force

Newton's Third Law

6.1: Force

nodes

12.2: Standing Waves and Resonance

normal modes

12.2: Standing Waves and Resonance

O

orbit

10.1: The Inverse-Square Law

overtones

12.2: Standing Waves and Resonance

P

parabolic trajectory

10.1: The Inverse-Square Law

particle

1.1: Introduction

phase angle

11.2: Simple Harmonic Motion

potential energy

5.1: Conservative Interactions

Principle of Relativity

2.1: The Law of Inertia

2.4: In Summary

R

resonance

12.2: Standing Waves and Resonance

restoring force

11.1: Introduction- The Physics of Oscillations

rocket propulsion

3.3: Extended Systems and Center of Mass

S

Schwarzschild radius

10.2: Weight, Acceleration, and the Equivalence Principle

semimajor axis

10.1: The Inverse-Square Law

semiminor axis

10.1: The Inverse-Square Law

Simple harmonic motion

11.2: Simple Harmonic Motion

small angle approximation

11.3: Pendulums

specific heat

13.2: Introducing Temperature

standing wave

12.2: Standing Waves and Resonance

state function

13.4: The Second Law and Entropy

Static Friction

6.3: Forces Not Derived From a Potential Energy

T

tangential acceleration

8.4: Motion on a Circle (Or Part of a Circle)

tension

6.3: Forces Not Derived From a Potential Energy

tidal force

10.5: Advanced Topics

tidal locking

10.5: Advanced Topics

Torque

9.4: Torque

transverse wave

12.1: Traveling Waves

traveling wave

12.1: Traveling Waves

W

Wave function

12.1: Traveling Waves

wave motion

12.1: Traveling Waves

Y

Young Modulus

[12.1: Traveling Waves](#)

Z

zeroth law of thermodynamics

[13.2: Introducing Temperature](#)
