

Index

C

capacitance coefficients

[3.3: Electrostatic Field Energy](#)

CGS system

[1.6: The CGS System of Units](#)

circular waveguides

[12.5: Circular Waveguides](#)

classical radius of the electron

[8.5: Scattering from a Stationary Atom](#)

coefficients of induction

[5.5: Inductance Coefficients](#)

conducting body

[2.5: A Conducting Body](#)

crown glass

[10.7: Example- Crown Glass](#)

Curie temperature

[6.1: Introduction to Ferromagnetism](#)

D

digital magnetic recording

[6.3: Digital Magnetic Recording](#)

discontinuities

[12.3: Waveguide Discontinuities](#)

E

electrical double layer

[2.6: Continuity of the Potential Function](#)

electrode potential

[2.6: Continuity of the Potential Function](#)

electromagnets

[6.4: Electromagnets](#)

elliptically polarized plane waves

[9.3: Elliptically Polarized Plane Waves](#)

F

free surface charge density

[2.5: A Conducting Body](#)

H

hysteresis loop

[6.2: B-H Curves](#)

I

image charges

[3.2: Soluble Problems](#)

K

Karlqvist approximation

[6.3: Digital Magnetic Recording](#)

M

Magnetic dipole

[7.5: A Point Magnetic Dipole](#)

magnetic hysteresis

[6.2: B-H Curves](#)

magnetic susceptibility

[6.1: Introduction to Ferromagnetism](#)

Maxwell stress tensor

[3.3: Electrostatic Field Energy](#)

O

Onsager problem

[3.5: Appendix\(A\) - The Onsager Problem](#)

P

phasor

[9.2: Phasors](#)

potential function

[2.2: The Scalar Potential Function](#)

Poynting's theorem

[8.2: Poynting's Theorem](#)

T

torque density

[1.5: The Force Density and Torque Density in Matter](#)

transverse electric (TE) modes

[12.2: Higher Order Modes](#)

transverse magnetic (TM) modes

[12.2: Higher Order Modes](#)

V

virgin state

[6.2: B-H Curves](#)
