

TABLE OF CONTENTS

Licensing

1: Introduction to Classical Mechanics

- 1.1: Introduction

2: Units, Dimensional Analysis, Problem Solving, and Estimation

- 2.1: The Speed of light
- 2.2: International System of Units
- 2.3: Dimensions of Commonly Encountered Quantities
- 2.4: Order of Magnitude Estimates - Fermi Problems

3: Vectors

- 3.1: Vector Analysis
- 3.2: Coordinate Systems
- 3.3: Vectors
- 3.4: Vector Product (Cross Product)

4: One Dimensional Kinematics

- 4.1: Introduction to One Dimensional Kinematics
- 4.2: Position, Time Interval, and Displacement
- 4.3: Velocity
- 4.4: Acceleration
- 4.5: Constant Acceleration
- 4.6: One Dimensional Kinematics and Integration

5: Two Dimensional Kinematics

- 5.1: Introduction to the Vector Description of Motion in Two Dimensions
- 5.2: Projectile Motion

6: Circular Motion

- 6.1: Introduction to Circular Motion
- 6.2: Circular Motion- Velocity and Angular Velocity
- 6.3: Circular Motion- Tangential and Radial Acceleration
- 6.4: Period and Frequency for Uniform Circular Motion
- 6.5: Angular Velocity and Angular Acceleration
- 6.6: Non-circular Central Motion

7: Newton's Laws of Motion

- 7.1: Force and Quantity of Matter
- 7.2: Newton's First Law
- 7.3: Momentum, Newton's Second Law and Third Law
- 7.4: Newton's Third Law- Action-Reaction Pairs

8: Applications of Newton's Second Law

- 8.1: Force Laws
- 8.2: Fundamental Laws of Nature
- 8.3: Constraint Forces
- 8.4: Free-body Force Diagram
- 8.5: Tension in a Rope
- 8.6: Drag Forces in Fluids
- 8.7: Worked Examples

9: Circular Motion Dynamics

- 9.1: Introduction Newton's Second Law and Circular Motion
- 9.2: Universal Law of Gravitation and the Circular Orbit of the Moon
- 9.3: Worked Examples Circular Motion
- 9.4: Appendix 9A The Gravitational Field of a Spherical Shell of Matter .

10: Momentum, System of Particles, and Conservation of Momentum

- 10.1: Introduction
- 10.2: Momentum (Quantity of Motion) and Average Impulse
- 10.3: External and Internal Forces and the Change in Momentum of a System
- 10.4: System of Particles
- 10.5: Center of Mass
- 10.6: Translational Motion of the Center of Mass
- 10.7: Constancy of Momentum and Isolated Systems
- 10.8: Momentum Changes and Non-isolated Systems
- 10.9: Worked Examples

11: Reference Frames

- 11.1: Introduction to Reference Frames
- 11.2: Galilean Coordinate Transformations
- 11.3: Law of Addition of Velocities - Newtonian Mechanics
- 11.4: Worked Examples

12: Momentum and the Flow of Mass

- 12.1: Introduction to Momentum and the Flow of Mass
- 12.2: Worked Examples
- 12.3: Rocket Propulsion

13: Energy, Kinetic Energy, and Work

- 13.1: The Concept of Energy and Conservation of Energy
- 13.2: Kinetic Energy
- 13.3: Kinematics and Kinetic Energy in One Dimension
- 13.4: Work done by Constant Forces
- 13.5: Work done by Non-Constant Forces
- 13.6: Work-Kinetic Energy Theorem
- 13.7: Power Applied by a Constant Force
- 13.8: Work and the Scalar Product
- 13.9: Work done by a Non-Constant Force Along an Arbitrary Path
- 13.10: Worked Examples
- 13.11: Work-Kinetic Energy Theorem in Three Dimensions

- 13.12: Appendix 13A Work Done on a System of Two Particles

14: Potential Energy and Conservation of Energy

- 14.1: Conservation of Energy
- 14.2: Conservative and Non-Conservative Forces
- 14.3: Changes in Potential Energies of a System
- 14.4: Change in Potential Energy and Zero Point for Potential Energy
- 14.5: Mechanical Energy and Conservation of Mechanical Energy
- 14.6: Spring Force Energy Diagram
- 14.7: Change of Mechanical Energy for Closed System with Internal Nonconservative Forces
- 14.8: Dissipative Forces- Friction
- 14.9: Worked Examples

15: Collision Theory

- 15.1: Introduction to Collision Theory
- 15.2: Reference Frames and Relative Velocities
- 15.3: Characterizing Collisions
- 15.4: One-Dimensional Collisions Between Two Objects
- 15.5: Worked Examples
- 15.6: Two Dimensional Elastic Collisions
- 15.7: Two-Dimensional Collisions in Center-of-Mass Reference Frame

16: Two Dimensional Rotational Kinematics

- 16.1: Introduction
- 16.2: Fixed Axis Rotation- Rotational Kinematics
- 16.3: Rotational Kinetic Energy and Moment of Inertia
- 16.4: Conservation of Energy for Fixed Axis Rotation
- 16.5: Appendix 16A- Proof of the Parallel Axis Theorem

17: Two-Dimensional Rotational Dynamics

- 17.1: Introduction to Two-Dimensional Rotational Dynamics
- 17.2: Vector Product (Cross Product)
- 17.3: Torque
- 17.4: Torque, Angular Acceleration, and Moment of Inertia
- 17.5: Torque and Rotational Work

18: Static Equilibrium

- 18.1: Introduction Static Equilibrium
- 18.2: Lever Law
- 18.3: Generalized Lever Law
- 18.4: Worked Examples
- 18.5: Appendix 18A The Torques About any Two Points are Equal for a Body in Static Equilibrium

19: Angular Momentum

- 19.1: Introduction
- 19.2: Angular Momentum about a Point for a Particle
- 19.3: Torque and the Time Derivative of Angular Momentum about a Point for a Particle
- 19.4: Conservation of Angular Momentum about a Point
- 19.5: Angular Impulse and Change in Angular Momentum

- 19.6: Angular Momentum of a System of Particles
- 19.7: Angular Momentum and Torque for Fixed Axis Rotation
- 19.8: Principle of Conservation of Angular Momentum
- 19.9: External Angular Impulse and Change in Angular Momentum

20: Rigid Body Kinematics About a Fixed Axis

- 20.1: Introduction
- 20.2: Constrained Motion - Translation and Rotation
- 20.3: Angular Momentum for a System of Particles Undergoing Translational and Rotational
- 20.4: Kinetic Energy of a System of Particles
- 20.5: Rotational Kinetic Energy for a Rigid Body Undergoing Fixed Axis Rotation
- 20.6: Appendix 20A Chasles's Theorem- Rotation and Translation of a Rigid Body

21: Rigid Body Dynamics About a Fixed Axis

- 21.1: Introduction to Rigid Body Dynamics
- 21.2: Translational Equation of Motion
- 21.3: Translational and Rotational Equations of Motion
- 21.4: Translation and Rotation of a Rigid Body Undergoing Fixed Axis Rotation
- 21.5: Work-Energy Theorem
- 21.6: Worked Examples

22: Three Dimensional Rotations and Gyroscopes

- 22.1: Introduction to Three Dimensional Rotations
- 22.2: Gyroscope
- 22.3: Why Does a Gyroscope Precess?
- 22.4: Worked Examples

23: Simple Harmonic Motion

- 23.1: Introduction to Periodic Motion
- 23.2: Simple Harmonic Motion- Analytic
- 23.3: Energy and the Simple Harmonic Oscillator
- 23.4: Worked Examples
- 23.5: Damped Oscillatory Motion
- 23.6: Forced Damped Oscillator
- 23.7: Small Oscillations
- 23.8: Appendix 23A- Solution to Simple Harmonic Oscillator Equation
- 23.9: Appendix 23B - Complex Numbers
- 23.10: Solution to the Underdamped Simple Harmonic Oscillator
- 23.11: Solution to the Forced Damped Oscillator Equation

24: Physical Pendulums

- 24.1: Introduction to Physical Pendulums
- 24.2: Physical Pendulum
- 24.3: Worked Examples
- 24.4: Appendix 24A Higher-Order Corrections to the Period for Larger Amplitudes of a Simple Pendulum

25: Celestial Mechanics

- 25.1: Introduction- The Kepler Problem
- 25.2: Planetary Orbits

- 25.3: Energy and Angular Momentum, Constants of the Motion
- 25.4: Energy Diagram, Effective Potential Energy, and Orbits
- 25.5: Orbits of the Two Bodies
- 25.6: Kepler's Laws
- 25.7: Worked Examples
- 25.8: Appendix 25A Derivation of the Orbit Equation
- 25.9: Appendix 25B Properties of an Elliptical Orbit
- 25.10: Appendix 25C Analytic Geometric Properties of Ellipses

26: Elastic Properties of Materials

- 26.1: Introduction
- 26.2: Stress and Strain in Tension and Compression
- 26.3: Shear Stress and Strain
- 26.4: Elastic and Plastic Deformation

27: Static Fluids

- 27.1: Introduction to Static Fluids
- 27.2: Density
- 27.3: Pressure in a Fluid
- 27.4: Pascal's Law - Pressure as a Function of Depth in a Fluid of Uniform Density in a Uniform Gravitational Field
- 27.5: Compressibility of a Fluid
- 27.6: Archimedes' Principle - Buoyant Force

28: Fluid Dynamics

- 28.1: Ideal Fluids
- 28.2: Velocity Vector Field
- 28.3: Mass Continuity Equation
- 28.4: Bernoulli's Principle
- 28.5: Worked Examples- Bernoulli's Equation
- 28.6: Laminar and Turbulent Flow

29: Kinetic Theory of Gases

- 29.1: Introduction- Gases
- 29.2: Temperature and Thermal Equilibrium
- 29.3: Internal Energy of a Gas
- 29.4: Ideal Gas
- 29.5: Atmosphere
