

## Index

### A

acceleration

4.4: Acceleration

Angular acceleration

17.4: Torque, Angular Acceleration, and Moment of Inertia

angular impulse

19.5: Angular Impulse and Change in Angular Momentum

19.9: External Angular Impulse and Change in Angular Momentum

Archimedes' principle

27.6: Archimedes' Principle - Buoyant Force

Average Acceleration

4.4: Acceleration

average power

13.7: Power Applied by a Constant Force

Average Velocity

4.3: Velocity

### B

Bernoulli's equation

28.4: Bernoulli's Principle

Bulk modulus

27.5: Compressibility of a Fluid

bulk strain

27.5: Compressibility of a Fluid

buoyancy

27.6: Archimedes' Principle - Buoyant Force

### C

Cartesian coordinates

3.2: Coordinate Systems

Classical mechanics

1.1: Introduction

Coefficient of Restitution

15.3: Characterizing Collisions

complex numbers

23.9: Appendix 23B - Complex Numbers

Components

3.3: Vectors

Conservation of angular momentum

19.8: Principle of Conservation of Angular Momentum

conservative force

14.2: Conservative and Non-Conservative Forces

continuum mechanics

1.1: Introduction

Couette flow

28.6: Laminar and Turbulent Flow

Coulomb's Law

8.2: Fundamental Laws of Nature

Cross product

3.4: Vector Product (Cross Product)

17.2: Vector Product (Cross Product)

cylindrical coordinates

3.2: Coordinate Systems

### D

damped oscillatory motion

23.5: Damped Oscillatory Motion

dark energy

1.1: Introduction

De mundi systemate

1.1: Introduction

density

27.2: Density

dimension

2.3: Dimensions of Commonly Encountered Quantities

displacement

4.2: Position, Time Interval, and Displacement

### E

elliptic orbit law

25.6: Kepler's Laws

equal area law

25.6: Kepler's Laws

Euler's equations of motion

1.1: Introduction

### F

Fermi problems

2.4: Order of Magnitude Estimates - Fermi Problems

fixed axis rotation

16.2: Fixed Axis Rotation- Rotational Kinematics

flywheel

22.2: Gyroscope

force laws

8.1: Force Laws

Friction

14.8: Dissipative Forces- Friction

### G

Gyroscope

22.2: Gyroscope

22.3: Why Does a Gyroscope Precess?

### H

Hooke's law

8.1: Force Laws

14.4: Change in Potential Energy and Zero Point for Potential Energy

Hooke's law

26.2: Stress and Strain in Tension and Compression

Hypotheses non fingo

1.1: Introduction

### I

Ideal gas

29.4: Ideal Gas

ideal gas equation of state

29.4: Ideal Gas

Ideal gas law

29.4: Ideal Gas

inelastic collisions

15.3: Characterizing Collisions

instantaneous acceleration

4.4: Acceleration

instantaneous power

13.7: Power Applied by a Constant Force

Instantaneous velocity

4.3: Velocity

### K

Kepler's laws

25.6: Kepler's Laws

### L

laminar flow

28.6: Laminar and Turbulent Flow

law of addition of velocities

11.3: Law of Addition of Velocities - Newtonian Mechanics

Leonhard Euler

1.1: Introduction

lever law

18.2: Lever Law

light year (unit)

2.2: International System of Units

### M

meter (unit)

2.2: International System of Units

Moment of Inertia

16.3: Rotational Kinetic Energy and Moment of Inertia

17.4: Torque, Angular Acceleration, and Moment of Inertia

### N

Newton's Universal Law of Gravitation

1.1: Introduction

Newtonian induction

8.1: Force Laws

### O

orbit

25.4: Energy Diagram, Effective Potential Energy, and Orbits

Orbit equation

5.2: Projectile Motion

Orbits

5.2: Projectile Motion

### P

Parallel axis theorem

16.3: Rotational Kinetic Energy and Moment of Inertia

16.5: Appendix 16A- Proof of the Parallel Axis Theorem

parsec (unit)

2.2: International System of Units

Pascal's law

27.4: Pascal's Law - Pressure as a Function of Depth in a Fluid of Uniform Density in a Uniform Gravitational Field

28.5: Worked Examples- Bernoulli's Equation

Pascal's Principle

28.5: Worked Examples- Bernoulli's Equation

period law

25.6: Kepler's Laws

Philosophiae

Naturalis

Principia

Mathematica

1.1: Introduction

Physical pendulum

24.2: Physical Pendulum

## Physical Quantities

[3.1: Vector Analysis](#)

## poise (unit)

[28.6: Laminar and Turbulent Flow](#)

## position

[4.2: Position, Time Interval, and Displacement](#)

## precessional angular velocity

[22.2: Gyroscope](#)

## principle of conservation of energy

[1.1: Introduction](#)

## Projectile motion

[5.2: Projectile Motion](#)

## Q

## Quantum mechanics

[1.1: Introduction](#)

## R

## radian (unit)

[2.2: International System of Units](#)

## reduced mass

[25.2: Planetary Orbits](#)

## relative velocity

[15.2: Reference Frames and Relative Velocities](#)

## Reynolds Number

[28.6: Laminar and Turbulent Flow](#)

## Rocket equation

[12.3: Rocket Propulsion](#)

## rotational kinetic energy

[16.3: Rotational Kinetic Energy and Moment of Inertia](#)

## rotational power

[17.5: Torque and Rotational Work](#)

## rotational work

[17.5: Torque and Rotational Work](#)

## S

## Scalar

[3.1: Vector Analysis](#)

## Scalar product

[13.8: Work and the Scalar Product](#)

## SI units

[2.2: International System of Units](#)

## simple pendulum

[23.3: Energy and the Simple Harmonic Oscillator](#)

## special theory of relativity

[1.1: Introduction](#)

## Spherical coordinates

[3.2: Coordinate Systems](#)

## spin angular velocity

[22.2: Gyroscope](#)

## Statistical mechanics

[1.1: Introduction](#)

## steradian (unit)

[2.2: International System of Units](#)

## superelastic collisions

[15.3: Characterizing Collisions](#)

## T

## tensile strain

[26.2: Stress and Strain in Tension and Compression](#)

## tensile stress

[26.2: Stress and Strain in Tension and Compression](#)

## thrust

[12.3: Rocket Propulsion](#)

## Torque

[17.3: Torque](#)

[17.4: Torque, Angular Acceleration, and Moment of Inertia](#)

[19.3: Torque and the Time Derivative of Angular Momentum about a Point for a Particle](#)

## totally inelastic collisions

[15.3: Characterizing Collisions](#)

## Turbulent flow

[28.6: Laminar and Turbulent Flow](#)

## U

## universal law of gravitation

[8.2: Fundamental Laws of Nature](#)

## V

## vector

[3.1: Vector Analysis](#)

## Vector Addition

[3.3: Vectors](#)

## vector decomposition

[3.3: Vectors](#)
