

CHAPTER OVERVIEW

29: Kinetic Theory of Gases

[29.1: Introduction- Gases](#)

[29.2: Temperature and Thermal Equilibrium](#)

[29.3: Internal Energy of a Gas](#)

[29.4: Ideal Gas](#)

[29.5: Atmosphere](#)

Thumbnail: Motion of gas molecules. The randomized thermal vibrations of fundamental particles such as atoms and molecules—gives a substance its “kinetic temperature.” Here, the size of helium atoms relative to their spacing is shown to scale under 1950 atmospheres of pressure.
